WINTER CONCERT OF
MUSICAL CLUBS DEC. 17

The concert on December 17th promises to be the best winter concert ever given. The clubs are much better than usual, as shown by the selections given at the Wescoty concert last week. This is owing to the fact that more interest and enthusiasm are to have been taken by the student body, both in the club and in the public. The concert will be held by the Wescoty Schola, with the help of the Sichota, and the latter will be at the Fordham Hall, Monday morning December 27th to January 1st, will have been decided upon the preliminary pages they wish to use.

The four men who have their histories selected will receive a prize of $10, money will be reported favorably to the Electoral Committees, provided they wish to use.

When one history from each class has been taken upon the preliminary pages will be returned to the historian selected and he will be given a certain amount of time to get the work completed.

Any man who passes in preliminary pages will be credited with his effort and will be communicated with through the Cage room will be an additional facility which will be at the Institute much of the time.

Several are among the most prominent historians from the student body.

Each prospective author should see his subject of Friday Entertainment "Boston Elevated System"

J. H. Neal, general auditor of the Boston Elevated will speak at the evening. "Comparison of the Boston Elevated with other systems" will be the theme of the evening. The talk will be given at the meeting of President Macfarlane's extensive collection of views, gathered while on his trip across.

EXHIBITION TODAY

The Quincy Market Storage plant will be visited by the Mechanical Engineering Society this afternoon. Those members who wish to go will meet in 24 Eng. B, at two o'clock. The plant is the largest in England, and supplies most of the market in the east coast of Boston. It has not been visited by the society for a number of years, and it is in the condition of a large sugar factory on a much larger scale than any other. This is the first exhibition of the season and also enlivens the tremendous demand of food which is used in a large city.

The excursions of the society are every year an interesting feature per plate about Boston, and these are usually about six in all. The students of the Technical High School and numerous lower plants have been among the points visited. The first excursion of the year will and probably will be held as Wednesday afternoon for free for students.

The daytime color wash which has displaced the time-honored night wash at Michigan is pronounced a "Molly-coddle" affair by a prominent member of the faculty.

COMPETITION OPENS FOR TECH SHOW POSTER

This is the twelfth annual Show and of the posters for the eleven above already held, forty were drawn by students and the other seven by professionals. As everything else about the Show is done by students it would be entirely out of the way if the management were forced to call on professional talent especially when there is such an abundance of it here in the Institute, as evidenced by Technique and architectural work. It is the duty of every person who has any, or thinks he has any talent in this line to come out and try for that spot. Everybody should at least attend the meeting in the Show office tomorrow and hear what Publicity Manager H. C. Davis, Jr. has to say on the subject. At this meeting full instructions and suggestions will be given. If anyone is unable to attend the meeting tomorrow he should see or leave a note at Cafe for H. C. Davis, Jr., Publicity Manager.

Reception of the poster of this year's Tech Show, "The Queen of the Captured Isles," is to start tomorrow, when a meeting of all who expect to draw will be held in the Show office, Room "M" Union at 4:30. A prize of $100 will be awarded for the best drawing submitted.

The poster is to contain the words "Tech Show" and the title of the play, and will be in two colors and black, preferably printed on white. Any drawing not made according to direction will have to be rejected. The poster should deal with the title of the play so it is not necessary to know anything about the book.
