WIRELESS STATION

Work On Equipment In Progress
Location In A Union

On November 26, a petition was sent to the Executive Committee of the Institute for "permission to erect a wireless station at the Institute according to the plans laid down. It was voted that the committee would give necessary consideration to the petition at its next meeting."

The station committee was received by Pres. E. L. MacLaurin and permission was granted to erect a wireless station at the Institute according to the plans laid down. However, it was deemed advisable to defer the installation of the powerful sending station until the matter of permits in connection with government and commercial stations could be carefully worked out and with it be established for a certainty that no trouble would result from such a plant.

One of the main objects of the Wireless Society is to do away with unnecessary interference and on this question it is to be carefully worked out before the station is equipped with a powerful transmitter for sending.

The wireless station is to be located in the west corner of Room A in the Union. It was not expected that any serious trouble would result from the station running on the ordinary methods of work. It behooves us, amid the thousand distractions of the modern college, which I believe in, to go on as far as possible to remember that it is a serious world, where a man who does not put his utmost effort into his work soon falls behind.

As a meeting of the executive committee of the Boston Chemical Club of Harvard it was voted that the kind invitation of the Technology Chemical Club be accepted and that an invitation be extended to the members of the Technology Club to attend any of the meetings of the Boston Chemical Club that they may care to.

On November 26, Mr. C. V. Root will speak at the Harvard Union on "The Union Field" and Mr. C. W. Brewster on "Experiments at Bradford." All Tech men are invited to go to this meeting which should make their membership known to the Secretary of the Chemical Club at once.

The football season between the West and the East had been a success, the West and one tied. The class committee have made arrangements for the football "fans" to get their tickets early.

Another word, for the football "fans." Have you heard the latest style football? The old school players believe thoroughly in the former open football and they are trying to reestablish it in the good graces of the present coaches.
