"THE DOPESTER"

Hurrah for Basketball! Season opens to-day.

Quite a Basketball Schedule, Isn't it?

What do you think of Billings' hockey schedule.

Stankard of Waltham is still on the All-Interscholastic Team. Did you notice that.

Before Walter Camp announces his All-American Football Team, here is the "Dopester's" picking:

Kilpatrick of Yale left end
Hobbs of Yale left tackle
Andrus of Yale left guard
Cooney of Yale center
Tobin of Dartmouth right guard
Fish of Harvard right tackle
Smith of Harvard right end
Sprackling of Brown quarter
Coy of Yale left half
Philbin of Yale right half
Minot of Harvard full back
Goebel of Yale sub-lineman
Allerdice of Michigan sub-backfield

BASKET BALL PRACTICE

A record squad was put through a lively practice yesterday afternoon at the gym. Enough men reported for four teams. Two teams played for about fifteen minutes, then the other two went at it. Finally two teams, picked from all the men, played for twenty minutes. These last two teams put up the fastest game seen at the gym this year.

A list of the men who reported are as follows:

Capt. Parker 1911, P. Wentworth 1910, F. G. Touts 1909, A. T. Bemis 1912, W. B. Hargraves 1909, W. P. Merether 1913, R. W. Chandler 1912, R. B. Stone 1912, W. M. Pettingell 1909, W. Johnson 1912, C. E. Ell 1911, G. S. Darling 1913, G. A. Cahill 1913, C. Green 1910, G. R. Lord 1910, A. P. Horner 1913, R. C. Stickney 1912, A. J. Freedman 1912, J. Balch 1913, S. C. Hart 1913.

—When the projected \$300,000 gymnasium of Syracuse is completed it will be the largest structure of its kind in the world.

WILLIAM BARTON ROGERS

(Continued from page 1.)

President Rogers' further aim was to have the Institute become eventually a university based upon pure applied science, but broadening into philosophy, a true university, moreover, where on the one hand, the advanced student should have every faculty for probing the deepest scientific problems, and where, on the other hand, the humblest mechanic should find educational help.

Dying at the graduation exercises, May 30, 1882, President Rogers lived only long enough to see the Institute emerge from the doubt and extreme poverty of the experimental stage. But he had forseen the extraordinary industrial development of the last twenty years in which Technology men have had so large a place, and he had planned an institute broad enough to meet it. That those men have kept pace with the educational and industrial demands, that they have given the Institute it's high reputation among colleges, is because, through the teaching of the faculty and through the traditions of the school, they have been in level with the character of the Founder, who not only established the Institute of Technology, but who created also the Technology atmosphere and spirit. Other college founders, have endowed with money; Rogers gave something of far more worth—himself.

HORNET'S NEST

"There's another letter for you Dick" said Cupid, looking up from his Bible, as Dick entered. "Seems to me you are getting a number of letters from The office these days, 'please explain' is it not?"

"Well at last they've got it straightened out" said Dick smiling. "My petition to take Suggestive Thermolectures (41144) has been granted. A week ago I received a letter from the office stating that I could not take it, and in the very same mail a request to please explain my absence; all for one and the same course. I talked it over with Prof. P. V. Diagram and petitioned. Now that petition is granted. The omission of a few lectures on account of The Office is, of course, no loss to me."

"Well, I have one about as good," said Cupid, "Today I received my second notification, called 'Third Notice,' by the way, to please explain cuts from Phys Lab. It so happens that I have been to The Office at 1.45 every day except Fridays, since the receipt of the first notice. I have lectures at nine every day except Mondays, and at 1.45 there have been so many men waiting there that I have gotten cold feet each day. But today I waited."

"The wait in line was really quite interesting. At 1.46 a woman asked me where the Chemical Laboratories were. At 1.47 I had the pleasure of explaining the procedure for obtaining a ticket to a Lowell Institute course. At 1.48 I played the role of mail clerk for a minute. At 1.59, on finishing the answer to the thirteenth question, I gave up in despair and beat it for my two o'clock at the top of A. I succeeded in seeing the door successfully closed with me on the outside. In the course of a few days there will of course be a few more notices."

"Why don't they have longer and more rational office hours around here anyway; times when the men have less to do than during the present hour," suggested Billiken.

"Most any time in the afternoon would hit me O. K." said Dick.

"Cupid opened his face to say merely, 'The same here.'"

If you like to wear your gloves long, wear

FOWNES GLOVES

They wear longer.

It won't leak

MOORE'S NON-LEAKABLE FOUNTAIN PEN

What would it be worth to you to own a Fountain Pen that you could carry around in your pocket or bag in any position with the positive assurance that it wouldn't leak? In Moore's Non-Leakable there is no way in which the ink can possibly leak out. This pen is always ready for instant use, and the moment it touches the paper, writes, without any preliminary shaking whatever. Furthermore, it will carry all grades of inks, including Copying and India inks. There are many different kinds of Fountain Pens on the market, but there is only one that is absolutely satisfactory, and that is Moore's Non-Leakable.
