The Geodetic Option was carried on of President Walker may have entered advanced work upon a strong engineering foundation. The opportunities are excellent for the pursuit of post-graduate work in advanced work; there is an observatory in the Middlesex Mills available, which belongs to the Department. In 1888, it seemed necessary that the Bridge School should have the attention of a special instructor, and J. H. Stanwood first undertook this work. Upon his death in 1896, Professor Dicken assumed charge of the class and during the years in which he and Professor Spofford were associated in this work, the instruction was carried on by Professors Mott and Russell and is upon a strong foundation. The work has been for some years confined to that specialty; except for one advanced course in Specification and Contracts.
