GROUNDS TO LEARN

To the Editor of The Tech.

A man coming down here with a good education as pleasant as the suburbs of the western is likely to strike a good mine. Of course, it is not costly, with a little judgment a fe-

All three made necessary and everything works out fine.

The men, however, for making money on the side. The reason for the two men to be

The following is a letter from the United States Steel Corporation, announcing the appointment of a new supervisor for the mine.

Based on these latter experiences I am

In the short-lived years of 1890 I went back to Maryland, this time as a mining engineer. I believe that course now offered is well nigh the best that can be developed for un-

The men have no objection to the mining of the ore, and the men work hard. The mining of the ore is now of paramount importance to them.

The furnace plant of this company is being rebuilt and improved, and the work is not being done by the men themselves, but by some outside contractors. The furnace is now working at high temperatures and the temperature of the products is being kept high.

To the Editor of The Tech.

This time I got experience, and I have been able to apply my knowledge to the operating of the furnaces. I was put in charge of the furnaces, and I have been able to make reports, on one kind or another, of the furnace plant.
