NEW ORGANIZATION SECURES CLUB ROOMS

Cosmopolitan Club Aims To Bring Foreigners Into In- stitute Activities

Yesterday afternoon at a meeting of the organization committee of the Cosmopolitan Club, it was decided to engage rooms for the club at 480 Boylston street, opposite the Rogers Building, the room committee having decided on this location as offering the greatest advantages.

In the absence of Prof. Doten, chairman of the constitution committee, Prof. Seaver read the constitution as decided upon, which, with some minor changes, was accepted. This constitution is patterned on that of a similar club at Harvard, and modified to suit Technology conditions.

The membership committee reported their work unfinished, and were empowered to complete their duties of selecting charter members.

This club has been started primarily to draw foreigners more closely into Technology life, to provide a place for them to meet each other socially, and to make it possible for them to learn more about the several countries other than their own and this one.

It has been found that owing to strangeness and difficulties of language foreigners, of which there are over a hundred at Tech, from non-English speaking countries, seldom enter into those beneficial activities and social relations that attract United States students; in fact students from remote parts of this country often experience a feeling of hesitation when coming into contact with men from New England.

By bringing these different classes and races of men together in a club where they may feel at home, and, by giving them a common interest, thus making them feel themselves a part of Institute life, this new club hopes to make Technology a more congenial and valuable place for them, and, reciprocally, make them of more benefit to the Institute.

The organizing committee, which for

TECH VS. TUFTS

Basket-Ball Teams Meet Tonight In Second Game Of Season

Tonight the basketball team meets Tufts at the Gym for their second game of the season. In the first game, played at Medford, Tufts played all around the Institute men, showing much better form, and displaying great team work. Tech was then handicapped by the loss of Wentworth at the last minute, Avery, who had very little practice with the team, being substituted. Tufts easily won by the score of 19 to 8.

Last year, although Tufts was beaten in the first game with Tech at the Tufts Gym, the Medford team came back strong in the game held over at the Gym and defeated Tech.

Capt. Parker reports that the team is in good shape and that they have all recovered from the effects of the rather stiff trip to New York.

The line-up will probably be as follows:

Tufts.	Tech.
Knight, rf	lb, Bennis
Hatch, lf	rb, Crocker
Atwood, c	c, Parker
Fisher, rb	lf, Johnson
Wallace, lb	rf, Hargraves

CONCERTS IN CHICAGO, ROCHESTER AND NEW YORK CONCLUDE TRIP

Western Alumni Associations Show Every Courtesy To Musical Clubs

That the western trip of the Musical Clubs was a grand success is certainly evident from the immense enthusiasm shown by the various Alumni associations. An account of the first part of the trip was published in yesterday's Tech, including the concerts at Buffalo and Detroit. From the latter place, the men proceeded to Chicago.

CHICAGO, THURSDAY, FEB. 3.

The men were taken to the new University Club, one of the finest clubhouses in the country, where they had dinner and dressed for the concert. The concert was given in Music Hall in the Fine Arts Building, before the most enthusiastic audience of the trip, numbering about seven hundred. There was no piano in the hall and the solo had to be omitted, but the Glee Club made out well enough with a pitch-pipe. The concert was received with unusual enthusiasm which reached its climax in the final number when two hundred alumni came upon the stage and joined the combined Musical Clubs in singing Bullard's "Stein Song." The concert had been interspersed with frequent class cheers from the alumni and the moving pictures brought out much applause, as most of the Chicago alumni had attended the Reunion.

After the concert a smoker was given in the large dinner hall of the University Club. The best good-fellowship reigned, and amusing stories were told by Sturgis, '87, Sturm, Hayer, Card, '04, and others. Cheers were given for Harvard, and Cornell in compliment to alumni who were present, and all the 'teen songs were sung. Finally Mr. Shortall, '87, manager of the first Technology Glee Club, sang "I See My Love at the Window," winning much applause by his yodelling. He told some interesting stories of the trip of the first Glee Club, and how they wrecked the Revere station and demoralized the police force of that metropolis on that occasion.

The smoker broke up at about half past twelve and as the train left at three many of the fellows took the opportunity to see something of the town. From all reports Jack Martin, Joe Northrup, Doc Moore, and Zeke Williams, were especially successful, but they succeeded in making the train just as a relief party was setting out at 2.50.

ROCHESTER, FRIDAY, FEB. 4.

On Friday the rising hour varied from 10 A. M. to 3 P. M., depending on how much Chicago the fellows had seen. Meals were served in the dining car and some remarks were made about the feathery taste of the water.

At Buffalo, where the train stopped for twenty minutes, Messrs. Ricker, Williams, Spalding, Watkins, and Boyd, came down to visit the crowd during their stop, a courtesy that was very highly appreciated.

After leaving Buffalo the fellows dressed on the train amid considerable confusion. The train reached Rochester shortly after seven and was met by F. W. Lovejoy '95, J. F. Ancona, C. F. Wray, and others, with automobiles. As most of the fellows had had no chance to get dinner they were first taken to the Seneca Hotel for a quick lunch, and then to the Alumni Gymnasium of the University of Rochester, concert. The Gymnasium was completely decorated with Tech flags, pennants, and red and gray bunting, loaned

for the occasion by the Alumni Association, and by Mr. A. D. Machlachlan '96. The attendance was especially gratifying in view of the fact that the concert of the Boston Symphony Orchestra, and a large subscription dance were given on the same evening. The concert was thoroughly enjoyed, though the program was somewhat shortened to allow the dancing to start early. Fourteen dances and several extras were on the order, and as there was a good floor, good music, and plenty of pretty girls, every member of the clubs had a good time that will not soon be forgotten.

The Alumni opened their homes to the fellows for the night, and all the men appeared at the train the next morning much refreshed and carrying many pleasant memories of their stay in Rochester.

NEW YORK, SAT., FEB. 5.

At 8.53 A. M. the train left for New York with all on board the special car, and reached New York on time at 5.40 P. M.

Arriving at New York the men went directly to the Technology Club, 17 Gramercy Park, where they dressed for dinner. The fellows were much struck with the comfort of the New York home of the alumni.

At 7.30 a banquet such as only the big New York hotels can provide was given in one of the banquet halls of the Hotel Knickerbocker. About two hundred alumni were present, and the banquet was marked by the greatest jollity. At intervals between the courses the Musical Clubs gave numbers, each one being followed by loud calls for more music. After coffee was served, Mr. R. S. Allyn, presiding as toastmaster, introduced W. H. King '94, who spoke for the Technology Club of New York, outlining its progress and its aims, and urging a still larger membership to develop it to its greatest efficiency.

Mr. A. F. Bemis, '93, president of the Alumni Association, was next introduced. He brought greetings from the Alumni Association and pledged the unwavering support of all the alumni to Pres. MacLaurin and his policies. Mr. Bemis aroused much enthusiasm by declaring his intention of immediately joining the Technology Club of New York.

Finally Dr. MacLaurin was presented amid the greatest enthusiasm. He spoke at length of the problems confronting the Institute, and a firm belief in the ultimate success of his mission. Dr. MacLaurin was cheered to the echo when he finished.

After the speeches, the moving pictures of the stunts, and of the Technique Rush were shown, and most all present had attended the Reunion in June, they were very much enjoyed.

The members of the Clubs were entertained overnight by the alumni, most of them staying at the Amsterdam Hotel. As the trip ended here the men did not return to Boston together, but have been returning in small groups by nearly every train since.

There can be no difference of opinion as to the success of the trip from every point of view. Great enthusiasm was aroused among the Alumni at every place visited, as was indicated by their cordial response in the matters of guarantees to cover expenses, and of entertaining members of the clubs. This en-

G. C. CLARK 1910 WINS SHOW POSTER CONTEST

Selection Made From Fifteen Exceptionally Good De- signs

To Charles Cameron Clark of Holyoke, Mass., has been adjudged the prize for the best poster handed in for Tech Show 1910, "The Queen of the Cannibal Isles." The selection was made from fifteen exceptionally good designs submitted, and the poster is the best one the Show has ever had, and reflects great credit upon Mr. Clark. In order to make the choice perfectly fair, Publicity Manager Davis asked three members of Course IV, two post-graduate men and one senior to aid him in his selection of the best poster. All three of them, after a careful judgment, independently reached the same conclusion, differing only in their choice of second place; so the poster chosen is undoubtedly the best of those entered in the competition.

The poster is done in three colors, black, green and yellow on a white background. The central figure is the Queen, a very charming damsel who is gaily dancing upon the back of a turtle, while a small monkey peeps up at her face from the lower corner with perfectly evident joy and amusement depicted in his expression. Behind the Queen there is a row of dancing girls, silhouetted against the background of palm trees, which contrasts very effectively with the principal figure, the Queen. A carefully and well-done medallion of dancing figures forms an excellent background for the Queen's head. At the top of the poster are the words "Tech Show" in black letters, and just below the turtle the words, "The Queen of the Cannibal Isles." Across the bottom a space has been left in which to put the theatre and performances.

SHOW REHEARSALS BEGIN

Rehearsals begin to-morrow. All old Show men and aspirants to the roles of cast, chorus, pretty girl, or dashing hero will report in force to stage manager Greenleaf, in the Union, at four o'clock sharp. This marks the beginning of the real work on the Show proper, and from now on rehearsals will be held about three times a week until the first performance on the 15th of April.

Mr. Francis arrived last night and will look over the candidates for the principals and chorus to-morrow. He will first read a description of the characters and the kind of man wanted, and will then call for the candidates for the different roles. Some of the music will be sung over in order to familiarize all with it as soon as possible, and assignments for rehearsals will be made by Stage Manager Greenleaf.

The management wishes to emphasize the importance of all new men especially reporting on this first day, as every day lost places them at a greater disadvantage in the competition. The work will start in earnest to-morrow afternoon, and the new men cannot afford to miss a single rehearsal, as attendance counts for a lot in the choice of candidates.

Today at one o'clock all candidates for the position of Freshman assistant in the Stage Department will meet Stage Manager Greenleaf in the Show office to receive instructions as to their work during the competition, which will last about two weeks. This de-
