**PROVISIONAL CAST PICKED FOR SHOW**

Francis Hears Would-Be-Stars
— Asst. Publicity Manager Wanted

This afternoon all aspirants to the title of principal characters in "The Queen of the Caissebals lakes" gathered in the Union to try out their voices and looks before the admiring audience. Calls for the principal men brought out long and short, fat and thin men, the gold-dust twins, as Mr. Francis calls them, and a merry crowd of others. Each one stepped to the piano and sang his favorite song, or as much of it as Mr. Francis could stand, and stepped to the微 cher or jocks of the locker room. It was indeed an interesting and a novel experience among the favorite selections which were rendered in solo, to O. R. Denison, accompanied with "I Wonder What She's Kissing Her Now," "Do, Ree, Mr., "I've Got Strings on My Finger," "Has Anybody here seen Kitty?" One announcement by Mr. Francis was, "I want singer, men and boys to play men's parts."

Last night a provisional cast was selected, the Publicity and the Stage Department. They were:

H. C. DAVIS, JR.,
Publicity Manager.

Debby, Kerr, Kemp, Scholfield, Attwater, Salladge, J. S. Freretson, Atwood, Mapos, Pever, B. S. Bardman, and S. F. A.

On Monday at one o'clock the competition for the last vacant place on the Show management—that of Freshman assistant in the Publicity Department—will be called by Publicity Manager H. C. Davis. This department offers attractions essentially for a man that can write, as most of the work is of a journalistic nature. The object of his branch of the management is to keep the Show in the eyes of the public, and to prepare the way for large houses at the performances. This year the Show may take trips to new places which means more work for the Publicity Department, and offers new fields for originality and ability in this line of work. Men can try for the Show itself, and the Publicity and at the same time, as the Show members will be pleased very shortly.

**THE ARENA**

Best luck to the fellows who take part in the meet tonight.

The Harvard-Yale relay race is double the usual event. In the two-man races each man runs six laps or 780 yards, a distance covering 490 yards short of two miles.

Since the trials for the relay team were not fast, it is expected that the time will be less than the Institute time of last year, which was 5:20. The time of the best two Men's teams on the three-fifths seconds behind the B. A. A. in the meet, record of three minutes and eight and two-fifths seconds.

Carl Gram, who was on the Tech relay team last year will this year run the eight-foot hurdle. Tech 1915 plays Wellesley this afternoon. We hope that they will do as well as they did last year.

Each poster is deserving of praise, and although the winning one not above, it must have been a difficult task to pick out the best one, all were excellent. They will be left up for a day or two days that a many see the good work of the artists.

**TECH RELAY TEAM VS. DARTMOUTH TONIGHT AT B. A. A.**

From left to right, L. O. Mills, W. O. Salisbury, R. S. Benson, H. Lockeett, F. A. White.

Tonight comes the climax of the indoor track season. The B. A. A. is to hold its twenty-first annual track meet on the track in Mechanics Building at 7.15. This meet has been a big feature for athletes for a number of years, and some years it is not expected to have as big a feature as usual. There have been at least 170 entries and the Floor will be on the front of the college and athletic organizations in the country are entered. The B. A. A. has entered a relay team which runs against Dartmouth in the 1600 run. Other men have been entered in the 300 yard hurdles, running high jump and the 45-yard hurdles.

In the 40-yard hand-in-hand dash, R. Chamberlin, who is J. A. A. is scratch man, E. H. Nelson of the B. A. A., J. W. N. Geary of Fordham, and T. I. T. of Storrs, are on the one-foot mark. Nat Sherman, the Dartmouth sprinter, is on the two-foot mark, and Carl Gram, the former Tech runner, now of the B. A. A., is on the three feet. Of the Technological men W. Salisbury has four feet, R. D. Foreman, W. J. G. Oettinger and J. S. Grant are on the five-foot mark; L. O. Mills has six feet. The only advance is, G. C. Cummings, H. Lockeett and R. M. McCall are on the seven-foot mark.

Judging from the poster designs submitted to the Tech Show committee, the Tech Show committee have selected some attractive groups. Yesterday eleven designs which were entered in the competition were on exhibition in the small room upstairs in the Union and they elicited much attention from the students who frequent the place.

Every poster is deserving of praise and although the winning one not above, it must have been a difficult task to pick out the best one, all were excellent. They will be left up for a day or two days that a many see the good work of the artists.

**POSTER EXHIBITION**
