

THE TECH

VOL. XXIX. NO. 91.

BOSTON, MASS., MONDAY, FEBRUARY 14, 1910

PRICE ONE CENT

RELAY TEAM WINS FROM DARTMOUTH

Tech Gains Lead In Last Lap After Exciting Race--- B. A. A. Notes

Technology won the relay race with Dartmouth at the B. A. A. Saturday night. The time was 3 minutes 11 3-5 seconds. The run was fiercely contested every foot of the way, and the result was doubtful until the last man had finished.

Sherman of Dartmouth ran against White of Tech, and he quickly jumped into the lead and took the pole from White. The latter tried hard to regain his lost position, but the crack Dartmouth man finished four yards ahead of him.

Lockett showed unexpected speed and with some brilliant headwork and plenty of grit slowly crept up on the Hanover man, Smith, until, in the last lap both men ran side by side. Lockett finished three yards ahead of Smith.

Mills for Technology and Baxter of Dartmouth took up the running. Mills ran smoothly for two laps, then weakened and lost all but a few feet of the lead Lockett gave him.

As Mills approached the finishing line, Salisbury stood ready to start. Quick as a flash he darted forward ahead of the last Dartmouth man, Hall, and steadily increased the distance between himself and his opponent until he crossed the line, winning for Technology by the comfortable margin of eight yards.

The surprises of the meet were the remarkable showing of the three Harvard relay teams, the all around work of Joe Horner of the University of Michigan, the fast time made by the Harvard relay team against Cornell and that made by the B. A. A. team against the N. Y. A. C. Sherman's victory in the 40-yard invitation was most unexpected, while Bonhag's triumph in the three-mile run was predicted and expected.

THE ARENA

Dartmouth had a good team, but Tech had a better one. Sherman, who ran first for Dartmouth should have run against Salisbury. There would have been a close contest.

Carl Gram, M. I. T. 1909, did fine work in the 40-yard dashes, but he excelled in the relay race between the B. A. A. and the N. Y. A. C. He ran first for the B. A. A. and opened up a considerable lead in the first lap.

Williams defeated Tufts in basketball Saturday by the score of 26 to 12. Tech was beaten by Tufts 18 to 10. Compare and see how Tech is coming out in the Williams game.

Harvard was more fortunate this year than last. Both Cornell and the Yale freshmen won their respective relay races with the Harvard teams last year. The Yale vs. Harvard race did not come off. This year Harvard had three victorious teams in the B. A. A. meet, winning from Cornell, the Yale freshmen and the Yale 'varsity.

Tuesday comes the trials for the two-mile relay which runs against Tufts in the Lawrence Light Guard meet at Medford Saturday.

PROVISIONAL CHORUS AND STARS PICKED

Candidates For Asst. Publicity Manager To Meet Today--- Show News

There were plenty of "fair chorus girls" out for the chorus of "The Queen of the Cannibal Isles" on Saturday afternoon. Over one hundred men reported, including a number of men who were in previous shows. Now that the cast and show have been provisionally picked, everything is in readiness to start Tech Show 1910 on its journey. The way the fellows have responded to the call for candidates was very gratifying to the stage manager and Coach Francis. The following provisional cast and chorus, from which the final cast will be chosen, is as follows:

PROVISIONAL CAST.

There are 19 principal parts in this year's play:

Henry Schlick, a millionaire from Pittsburg, C. F. Doble.

Roberta Schlick, his daughter, the heroine, C. P. Kean.

Henrietta Dean, her aunt, a widow, D. Kemp.

Bluffem Jones, a news correspondent from Boston, W. M. Schofield.

Lord Lengthleigh, an English traveler, R. Atwater.

Lieut. Jack Gordon, of the U. S. Navy, J. S. Selfridge.

Liliokazooka, Queen of the Cannibal Isles, M. R. Pevear.

Handi Singh, her chief admirer, K. D. Fernstrom.

Datto Gohn, Captain of the Royal Guard, H. E. Kebbon.

Sing Singhi, his son, in love with Katimaroi, D. Bent.

Katimaroi, a would-be Queen of the Cannibal Isles.

King Coco Cola, a neighboring monarch, H. S. Birchard.

Bright Eyes, the Royal Chef, P. A. Cushman.

Togo, a native official, T. A. Stewart.

SYNOPSIS OF SCENES.

Act 1—Garden of the Royal Palace, early morning.

Act 2—Near the shore, Cannibal Isles.

Act 3—Garden of the Royal Palace, next day.

Provisional List of the Chorus.

Members of the Chorus—Girls:

E. G. Brown; E. K. Jenckes; L. R. Golden; J. M. Hargraves; H. M. Cook;

M. A. Grossmann; H. P. Fesenden; R. Cremer; J. B. Chadwick; D. F. Conlon;

A. C. Davis; R. B. Kennard; R. E. Wilson; F. D. Mendenhall; F. L. Cobb; W. S. Moore; F. H. Achard; C. E. Holbrook;

R. D. Bonney; R. F. Symonds; P. G. Whitman; C. G. Fallon; T. R. Sender;

P. W. Bartel; J. L. Taylor; W. L. Whitehead; K. Van R. Dey; R. T. Portal;

R. T. Bailey; J. L. Howland; R. O. Ryder; P. Schmidt; R. M. Lowe; J. G. Russell; H. B. Hober.

Members of the Chorus—Men:

A. F. Dolliver; W. C. Bird; C. O. Dunlap; J. F. Cole; S. W. Selfridge; C. W. Brown; B. H. Zage; A. I. Edgerton;

A. F. Leary; R. H. Roane; P. Redfern; G. A. Cahill; A. W. Carpenter; A. C. Brown; C. F. Springall; T. S. Manley;

S. Brecks; R. D. Sampson; W. A. Gen-tever.

Today at one o'clock the competition for the last vacant place on the Show management—that of Freshman assistant in the Publicity Department—will be called by Publicity Manager H. C. Davis. This department offers attractions essentially for a man that can write, as most of the work is of a journalistic nature. The object of this branch of the management is to keep the Show in the eyes of the public, and to prepare the way for large houses at

WIRELESS LECTURES START ON TUESDAY

Prof. Cross Will Aim To Give Practical Series Of Talks

The course in Hertz Waves and Wireless Telegraphy starts next Tuesday. It consists of a series of lectures conducted by Prof. Cross, which are to be held in 22 Walker. The course is open to all second, third, and fourth year men; the work is elective, and there is no elimination. The lectures start a little earlier this year than they did last, because Prof. Cross wishes to have plenty of time to cover the subject.

The object of the course is to give students practical knowledge of the workings of wireless telegraphy. Prof. Cross will not go into any of the details of the manufacture of wireless apparatus, but will demonstrate fully the operation and principles of it.

The lectures will begin with the meaning and explanation of electrical waves in the air, and will follow this up through Hertz waves and their application in wireless telegraphy. The history of wireless telegraphy is necessary to a clear understanding of the reasons for development and improvement in the apparatus, and this history will be taken up, although not at very great length. There will be practical demonstration of the apparatus at the lectures, and this alone should serve to make them very interesting. All men who are at all interested in wireless telegraphy should grasp this chance to learn its principles, and those men taking the electrical course should follow these lectures because it pertains directly to the subject they are studying.

The course has been carried on at the Institute for two years previous to this.

PROF. JACKSON TO SPEAK

Applicability Of Electrical Power To Industrial Establishments

On Wednesday, February 16, there will be a joint meeting of the American Institute of Electrical Engineers and the American Society of Mechanical Engineers. This meeting will be held at the Boston City Club and one of the addresses to be made will be the presentation of a paper on "The Applicability of Electrical Power to Industrial Establishments." Prof. Jackson, head of the Electrical Engineering course at the Institute, will read this paper.

UNION DINING ROOM

Perhaps the article that appeared in last Friday's Tech gave a wrong idea about the matter of four-dollars-a-week board. The idea of the Management has been to find out how much of a demand there would be for such service and then to plan accordingly. To give it for this price may need fifty but more likely many more and the management is not at present willing to make definite statement as to just what the required number would be.

The performances. This year the Show may take trips to new places, which means more work for the Publicity Department, and offers new fields for originality and ability in this line of work. Men can try for the Show itself, and the Publicity end at the same time, as the Show members will all be picked very shortly.

DR. MACLAURIN TO MAKE EXTENSIVE TOUR

Will Lecture In Many Large Western Towns En Route

Boston, Feb. 14.—President Richard C. Maclaurin will make a 3,000-mile tour of the West, speaking in ten cities under the auspices of local Technology graduate clubs, leaving Boston next Friday.

He will represent Technology at the dedication of the new engineering buildings of the University of Kansas on February 25 in Lawrence. Representing the Alumni Association he will speak as follows:

February 19, Technology Club of Central New York, at Syracuse University Club; February 21, Technology Club of Buffalo, at the Buffalo University Club; February 22, Detroit Technology Club at Detroit University Club; February 24, Tech Club of Kansas City; February 26, Northwestern Alumni Association at Chicago; February 28, Technology Club of Cincinnati; March 1, Technology Club of Northern Ohio in Cleveland; March 2, Technology Club in Pittsburg, and March 3, Technology Club in Washington. It is probable that Dr. Maclaurin will also speak in St. Louis.

GAME POSTPONED

The game between the Freshmen and Wellesley High School which was scheduled for last Saturday afternoon, was postponed. At the last minute it was learned that the Wellesley team had disbanded. The next game which the 1913 team will play will come next Wednesday evening, when the Freshmen and Sophomores will meet in the second contest of their series.

Boston, Feb. 14.—The entire nation awaits news of some sort concerning the safety of the navy tug Nina, that a week ago left Hampton Roads with 32 men on board, bound for Charlestown Navy Yard. The government has ordered the Atlantic coast patrolled for the tug and wireless stations are endeavoring to locate the missing ship.

AGAINST PEARY.

Portland, Me., Feb. 14.—"The jealousy of the naval officers is what prevented the House Committee on Naval Affairs from reporting in favor of the bill to make Commander Robert E. Peary a Rear Admiral," said Congressman Allen, who introduced the bill in the House. "Of course I shall do what I can for the passage of the bill, but we are encountered with the opposition of the naval officers, and I have been told that the hostility of General Greely and Admiral Schley had something to do with the attitude of the committee."

Wellesley, Feb. 14.—What shall be done with the secret societies at Wellesley will be settled by a society congress of 29 members, non-society members, alumnae, undergraduates and members of the faculty. The board will be headed by President Hazard.

CALENDAR.

Monday, February 14.

1:00 Publicity Dept. Competition.
4:00 Show Principals Rehearsal.
4:15 Gym Team Practice.
Tuesday, February 15.
4:00 Trials—two-mile relay.
4:15 M. J. T. A. A. Meeting.
Wednesday, February 16.
8:00 Tech vs. Brown.
8:00 1912 vs. 1913.
