T. G. A. BOARD MEETING

There was a meeting of the Council of the T. G. A. yesterday at one o'clock. Many important matters were discussed, the chief of these being the question of membership. It was decided that on Wednesday evening, March 9, a general meeting will be held, to which all stu- dents will be invited. At this meeting the membership of the organization will be arranged and the support of every one urged. The association is now on a firm financial footing. In the main canvas of the freshman class over one hundred dollars was collected. The upper classes will now be tasked and they are expected to respond as eagerly as the freshmen did. On next Monday, the entire membership re- quirements will be published in these columns.

TEST RUN ON TURBINE

It is generally well known about the Institute that a new Curtis Turbine has been recently installed in the Low- ell Electrical Engineering Laboratory. This machine was tried for the first time Saturday morning. In the after- noon an efficiency test was made that proved to be extremely satisfactory. The turbine was run under 145 lbs. of steam pressure and 22 inches of vacuum. The machine is rated at 150 kilowatts and in the test that was obtained. Mr. Smith, the chief engineer, considers the turbine very satisfactory in every way and he believes that it could carry considerable more than the rated load. The Electrical and Mechanical Engineering Departments will make an economy test on it in a short time.
