All communications should be addressed to the Tech at 44 Trinity Place, Boston, Mass., March 17, 1910.

Are the relations between faculty and students really right? How are the two bodies' interests in common when it comes to seeing that the students appreciate their employers' standpoint? To a greater and greater extent the university has been passing into the hands of the students and the instructors are in greater and greater degree the custodians of the students' interests. It is not true that the idea of the University is in the minds of the students, or their employers, or their instructors is an idea that is an end in itself, but that the students are so valued as to be wanted by the instructors to show the students that they are really wanted by not giving nitie, unfriendly invitations, but specific ones. The small groups of students are not to be considered a body of change nor in the school system, but the idea is that the first time just shows the ground, the following bring out both sides.

This small group idea is far from being a new one, but it is also from being an idea that has been given the proper development. Those who have had and are attempting to bridge the gap by this method may rest assured that their efforts are far from futile, but it must be a general custom to be really effective in developing men able to understand current interests after they have left the Institute.

Editors "The Tech."

In the issue of March 16th it was announced that there would be no more weekly dinners of T. O. A. It should be stated that on account of T. O. A.'s observance of holy week there would be no classes held the last three days of March. The small group idea was accepted by the committee and the meeting held at 2.30 o'clock.

J. V. MASON, Graduating Socrty.

GENERAL NEWS

TELEGRAPH NEWS OF THE WEEK

Forecast for Boston and vicinity-for tomorrow-Slightly warmer, light west-south winds.

Boston, March 17th.-The Boston Society of Civil Engineers opened their sixth annual meeting at noon yesterday in the Boston City Club. The business session was attended by one hundred and fifty. The annual dinner was held at 5:30 o'clock.

Newport, R. I., March 17th.-Prof. Morley and Mr. Blaisdell.-In the long time presence of classical philosophy at Harvard University, died yesterday in Newport, R. I. He was recovering from an attack of pneumonia, and suffered a sudden fatal stroke of heart failure.

Boston, March 17th.-The annual spring influx of returning tourists to the city is at least two to three times the number of passengers on their way from foreign ports to Boston. Our correspondent states: "A large number of passengers on their way from foreign ports to Boston, and a few passengers, are generally found at the Union Station. The demand for tickets is greater than usual. The traffic is under the control of the Boston Union Station, which is the only point of call for the foreign ports." The demand for tickets is greater than usual. The traffic is under the control of the Boston Union Station, which is the only point of call for the foreign ports.

Providence, March 17th.-In the senate yesterday Rhode Island sent the women suffrage bill into oblivion by a vote of 19 to 5. The bill passed the right of women to vote for President and Vice-President only.

Cincinnati, March 17th.-Only by advancing wages can the coal workers of the country and laborers of the union mines, April 1st, according to reports made before the special commission of the United Mine Workers of America here, yesterday. The session was brief, but the laborers were unanimous in declared plainly that every money must be paid to the 100,000 workers who arrive here between March 17th and 31st. It seems that the demand for tickets is greater than usual. The traffic is under the control of the Boston Union Station, which is the only point of call for the foreign ports.
