RECENT DEVELOPMENT IN ORE DRESSING MACHINERY
Prof. R. H. Richards gives very instructive lecture before M. E. Society

Yesterday evening the Mining Engineering Society held the sixth meeting of the season, all of which gave approximately the ratio of 2.5 to 1 for the area of quartz and galena which would settle in the same time. The lecture was given in a process known as "hindered settling" with the assistance of a number of machines for crushing the ore. The process is very useful and will be of great advantage to the mining industry.

Following this, Professor Robert H. Richards, head of the department of Mining Engineers at Pittsburg and also before the American Institute of Mining Engineers, showed other appliances such as trommels, classifiers, and concentrators. The apparatus in the drabs in the property of the Institute and is loaned to students who will be sobered for the lecture. The apparatus will be loaned to the students. The lecture will be closed after 45 minutes.

Additional Charges
D. A. A. is now in charge of 12 cents in used to students who are registered for the course as follows: a table of values for the power which other kinds of machines take using natural settling, also it shows how the power can be saved. The apparatus is shown for the first time in the space.

The Willey table was the next topic of the lecture and was shown. The illustrations obtained using natural settling and classified feed. It was shown that with natural feed the losses were high, while with classified feed the loss results of all were obtained.

About sixty students were present, but the lecture was well attended. Following the lecture there was a social hour with refreshments.

There is sure to be some wonderful work done this spring before the incident, for the weather is much colder in the interior and 31.3-5.0 for the surprising 1909.-1910 season.

The Princeton rowing season starts Monday. The plans for the year have not been set up as yet, but it is very certain that they will be set up before Saturday. The season looks the services of Prindle, who had shown unusually promising, as a candidate for the baseball team. He was hit behind the ear by a batted ball and knocked unconscious.

Crew Candidates on the Charles
Men Practicing With Harvard Shell On River Every Afternoon

The candidates for the crew are now preparing on the Charles River. A shell has been hired from the Harvard Athletic Association and will be used until Tech has its own shell. Manager Herzelbach is now trying to get a hand for a second-hand shell and he expects to have one soon.

Every afternoon the candidates report at the Union Boat House, and the men are given each a try-out. Usually there are three or four different eight out doing the course of the day. Selections are made on skin slips, at the supply-room.

The coach is pleased with the way the men are taking hold of the work and sees the making of a good crew out of two material. Most of the candidates are reporting at three o'clock, excepting a few who can not get around until four.

About thirty-five men are now reporting regularly. Many have had some previous rowing experiences, and of the others there are a number who are quickly picking up the knack of handing the oar.

COSMOPOLITAN CLUB

Only eleven active members were present at the luncheon meeting of the Cosmopolitan Club last night. At the luncheon Mr. Harold, the president, decided to postpone the consideration of the question of joining the other Cosmopolitan Clubs of the country.

The rooms are now almost completely furnished, there being a piano, a reading room, a bookcase, a desk, and a table. There are a number of pictures of cosmopolitan interest, but it is thought that the members of the other clubs will contribute these. The membership has increased to 82, including associate members who are neither students nor members of the governing staff at Tech.

GAME CANCELLED

Capt. Taylor of the Sophomore base- ball team yesterday morning to the effect that the game with Villanova for the afternoon could not be held. The President of the Sophomore base- ball team yesterday postponed. The game will be held in the afternoon as usual.

The Tech will hold an informal banquet on Sunday, April 12 at the Union. Mr. Tracy, managing editor of Technique, will be the speaker of the evening and will give valuable advice and suggestions on modern journalism. Other professors will be present: Mr. Penven and Mr. Carl Brown, the English department, J. W. Welsh, the chairman of the Tech, C. T. Taylor, director of the Tech in 1902, and Mr. R. Scharff, former member of the board. Admission to the dinner will be open to all who have ever been connected with Tech, and to all others who have been members of the Tech. Mr. Scharff has promised to arrange a simple but satisfying dinner, and the price, although not yet decided upon, is sure to be reasonable.

After a long discussion which threatened to result in a deadlock, David Pry Bembov, of Reading, Pa., was yesterday elected Business Manager of Technique 1912. Bembov is a lyric writer for the Tech Review. Last fall he was chosen class representative of the Institute Committee and is now secretary of the Talbot Street Committee. He is also a member of the Technique Editorial Committee.

The committee is now considering nominations for the positions of Secretary and Editor of Technique.

1913 TO PLAY ROXBURY

Teams Will Meet This Afternoon At Tech Field

This afternoon the field, the Freshmen will meet the Roxbury Latin High School team on the diamond. This is the second game of the season for both teams. The Freshmen won from E. H. S. last Saturday in a close ten inning game: Monday, Roxbury Latin was defeated by the Cambridge Latin School by the score of 12 to 3. The game was a good one. The visitors were the best played game in the season.

Roxbury's team will be probably made up of Glidden, Biddlefield, Walker, and H. J. O'Brian. The Freshmen candidates will probably get in the game.

TO HEAR ABOUT PAINTS

"Paints for Structural Work" will be the subject of a talk by A. H. Sabin, consulting chemist for the National Lead Company, held under the auspices of the Technique Alumni Association. The speaker will be one to whom you will come and will be at 8.00 P.M. Tuesday night, April 12.
