BOSTON, MASS., FRIDAY, APRIL 8, 1910

PRICE ONE CENT

BRUTAL ASSAULT ON INNOCENT PROFESSORS

"Freshs" Will Be Profs. And Profs. Will Be "Freshs" Motto At Chem. Dinner

Horribly weird in laboratory coats, the chemists gathered last night at the Union for their dinner. Lab. coats? Rags! It was pathetic. One poor senior had the whole back ripped out of his coat. The faculty were attired like verdant freshmen, that is to say, in bright, new, shiny, spick and span Lab. coats, which had never seen the cleaning mixture.

At seven o'clock the dinner began; the freshmen (alias the Profs.) were assigned to desks in the Kiddish laboratory, by instructor Geo. Lunt and Dr. Talbot (Dudley Clapp) said grace as follows:

Now I seat me down to feed,
Before this awful orgie here,
If I should die from what I eat,
Thank God, I have no Profs. to meet.
The soup was served in evaporating dishes, and was inhaled through pipettes; the butter was in scorifying dishes; the beer and ginger ale were partly in retorts, but to a greater extent in the air. The cheese was desiccators, the water in beakers; and above all, the men were in and around fine spirits.

Between courses M. K. Sweet 1910 played the violin, and numerous clever parodies were sung. Among the best of these were the following:

OPENING CHORUS

Tune—The Man Who Owns Broadway.
We are the men who run the 'Stute,
We are the faculty so cute.
The students are so gay,
We flunk them every day.
They come to try to work and not to play, they say.
The Course IV guys may happy be,
But they can't study chemistry.
If there's anything in Boston that you see you want, just say,
Drop a line to Walter,
Or else petition
The Faculty and we will see
That you will get it P. Q. D.

Tune—Anybody Here Seen Kelly?
Has anybody here seen Billy,
B-I Double L-Y
Has anybody here seen Billy,
Have you seen him passing by?
His noise is big, but he is small,
He thinks he's got it on them all,
Has anybody here seen Billy,
Billy with the great big I?
This last song was greatly enjoyed by Dr. Walker (also by his many admirers.)

Tune—Cheer Up, My Honey.
Fork up, oh fork up, you chemists,
Fork up your fifty to Rand,
Then you can take things,
Then you can break things,
What do you care where they land?
For every beaker you damage
Pay the supply room for three;
If it's a trifle wet,
Credit you cannot get.
Understand?

After the last cups of coffee had been done away with, and the last plate of ice-cream had been destroyed the toastmaster, Dr. Henry P. Tallmut, introduced as the first speaker of the evening Dr. Willing H. Talker. The subject of Prof. Talker's talk was, "Raw Raw Material." He treated the matter very exhaustively. Very! (Parenthetically, we will say that R. W. Jacoby 1910 gave an excellent imitation of Dr. William H. Walker).

After Dr. Talker, Dr. Tallmut intro-

THE CROWING EVENT OF THE YEAR

Faculty And Students To Gather Tonight At First Reception Of Its Kind Ever Given

An event never before attempted has been arranged for this evening. The Institute Committee in response to the increasing demand on the part of the students for more personal contact with the faculty has arranged for a reception to the Faculty by the students.

A very informal, and consequently enjoyable evening is planned. For the Faculty, Dean Burton, Prof. Dewey and Prof. Blachstein will give short characteristic talks. Prof. H. W. Smith will give a part of his illustrated lecture on his tour to the South Sea Islands.

For the students, the Glee Club will give a few selections from Tech songs among others. Also that far-famed "Faculty meeting" will be given by the members of the Biological Society. This "meeting" has already received interna-

ional reputation for its originality and well portrayed characters.

These events will take place downstairs in the dining room of the Union. After they are over, all will go upstairs, where refreshments will be served FREE.

When the appetites of the multitude have been appeased a general smoker will ensue. If anyone has any particular grudge to settle with the Faculty, individually or collectively, here is the chance of a lifetime. Come well loaded with smokes, as there will be plenty of opportunity to use them.

The affair will start officially at eight o'clock. If you want to get the best of the bargain get there early, as although the capacity of the dining room is large, a very large crowd has been arranged for, and "the early bird gets the worm."

REMEMBER FACULTY AND STUDENTS

Tonight---8:00 P. M.---The Union

duced Dr. Samuel P. Billiken, who spoke upon "Ring Systems and Eccentric Formulae." E. K. Jenckes was the courageous senior who essayed to mimic the inimitable manner of Dr. Mulliken.

Organic chemistry was illustrated by some of Dr. Mulliken's characteristic experiments.

Dr. Flunkem Hall Thop had for the text of sermon, "Mere Twaddle." R. S. Bicknell 1910 received tremendous applause when he remarked: "It doosn't make any difference whether we use a right-handed or a left-handed sprinkler."

Dr. Disgustus All Pill told with great exactitude "like unto this" about his work in the realm of gas and oil chemistry. His remarkable speech was ended by the unusual request and statement, "Please do not, in fact you must not, throw oily matter in this sink" L. W. Waters took the part of Dr. Gill—and took it well. So did Dr. Gill.

Dr. Miles Standish Peril (H. E. Stump), introduced as a famous golf player, gave an exceedingly interesting theoret. lecture on the subject, "Work done in the Solution of Problems." It was easily shown that the work done was equal to infinity.

A German quotation was the beginning of Dr. Funny J. More's speech. His talk was illustrated by slides (across the floor.) L. C. Shaw must have practiced long and faithfully to acquire Dr. Moore's manners, and especially his laugh.

The best imitation of the evening was R. E. Gegenheimer's rendering of Dr. Amiable Author Noise. He mimicked the voice, the intonation and the characteristic phrasing of Dr. Noyes perfectly. The speech ended with this beautiful mutilation from Longfellow: The heights by Tech men reached and kept,
Were not attained by sudden flights;
But they, while their companions slept,
Were grinding all the blessed nights.

Altogether, this was one of the most unique dinners ever given by any professional society at Tech. It was a thorough success in every way; and everybody had a good time—including the professors.

FRESH. VS. SOPHS. AT TECH FIELD SATURDAY

First Out-Door Meet Of Season Is Expected To Be Good Contest

1912-1913 TRACK MEET

On Saturday the first out-door freshman-sophomore meet will be held at Tech Field. The meet is going to be close, and it is expected that some very creditable performances will be seen. The sophomores got the best of the freshmen in the in-door meet, but outdoors there is a greater number of events and a chance for closer competition. The meet, however, is generally conceded to 1912, on account of the greater number of faster and more experienced men in that class. The cross-country race looks like a walk-over for the sophomores, as they possess many of the fastest varsity runners.

The 100 yd. dash will probably be a race for first between C. E. Trull 1913 and J. S. Grant 1912. The other places will go to S. E. Reed 1912, M. A. Oettinger 1912, J. Becker 1912, or H. G. Burnham 1913.

About the same men will place in the 220 yd. dash. Oettinger or Trull is picked to win, but will be pushed by Reed and J. I. Murray 1912.

A number of the fast quarter-milers in the two lower classes will not be able to run on account of baseball, and it is hard to foresee the result. Oettinger and Reed, both 1912, will surely place, but the other positions are practically unknown.

The 880 yd. run promises to be a close race, as a number of good men are slated for this event. R. D. Sampson, 1913, will probably win, but will be followed closely by R. D. Van Alstine 1912, B. S. Munch 1913, W. R. Bylund 1913, and C. L. Gabriel 1912.

The mile run is assured to A. S. Milliken 1913, the other places going to un-

FREE FEED FOR FIRST MAN TO GET TECHNIQUE

Most Eccentric Costume And The Largest Rips Will Also Earn Lunch

The Technique rush which comes off on Thursday, March 14, at 1.20 P. M., is going to be something extra this year. The rush will take place at the usual place, that is, in back of the old Art Museum. The first five books will be de luxe edition; the first twenty will contain the President's autograph signature.

The Union is going to serve a special thirty-cent lunch to the ordinary run of students, but three particular men will be served free: The man who gets the first copy, the man who has the most outlandish outfit, and the man who has his clothes torn the worst, will be presented with a beautiful, plush-lined lunch by the Union Dining Room. The judges who will decide between the various outlandish and torn paraphernalia have not been definitely chosen, but perhaps these duties will be undertaken by co-eds.

known men. All of the best 1912 men will be out of this event on account of the cross-country race.

The shot-put is conceded to J. L. Bray 1912, with J. Becker 1912, and N. D. MacLeod coming second, and third respectively.

The high jump will go to P. W. Dallymple 1912, who is sure to place the height in this event above the level of the other performances. The likely men for the other places are W. R. Bylund 1913, C. G. Fallon 1913, and H. B. Alvord 1912.

The broad jump is another event which it is hard to predict. There is no indoor competition, and therefore the jumpers in the freshman class are entirely unknown. H. Greenleaf 1912, and J. Becker 1912, will probably take the first two places.

H. Greenleaf 1912 should win the pole-vault with E. Mangan 1913, and R. S. Rankin 1913 coming second and third.

The hammer and discus are also events for dark horses. J. L. Bray 1912, and W. M. Ruby 1912, are the only men who have done anything at all in these events, and the first two places will undoubtedly go to them.

1913 BASEBALL CAPTAIN

F. E. Severance was yesterday elected captain of the Freshmen baseball team. Severance came to the Institute from the University of California, where he played first base on the varsity nine. He is playing in centre field for the Freshmen. In the game with Roxbury Latin Wednesday, he made four hits and scored two runs.

CALENDAR.

Friday, April 8.

4.00—Technique 1912 Electoral Committee Meets, Union.
8.00—Faculty Smoker, Union.

Saturday, April 9.

3.00—1912-1913 Track Meet, Tech Field.
3.00—Baseball, 1912 vs. M. A. H. S., Tech Field.
3.00—Baseball, 1913 vs. Wakefield, Wakefield.
