COMMUNICATION

To the Editor of the Tech,

Sir:—The adverse criticism of the Show in Wednesday's Tech was an unpleasant surprise to the many who had enjoyed and appreciated the play. The writer of the article seemed to forget that the authors and actors were amateurs and not professionals, and failed to give them credit for their remarkable work in spite of their inexperience. The Tech should have refused to publish such an attack on the students' greatest activity no matter how true the article might have been.

Boston, April 22.—The "bar and bottle" bill will not become operative this year, as a result of the first victory for the liquor interests in the fight over this legislation. Draper, and postponed all further action on it until after May 1, when all the liquor licenses in the state have been granted.

Birmingham, Ala., April 22.—The forty men entombed in the Mulga mine of the Birmingham Railway Coal and Iron Company at Mulga, Alt., by an explosion, have been given up as dead. Newburyport, April 22.—A. M. Herring made three successful flights yesterday in the Herring-Burgess bi-plane at the Plum Island aviation field. No attempt was made by Mr. Herring to attain a great height or to develop speed. During one of the flights, however, the bi-plane soared to the height of 60 feet and covered about 300 yards. The tests were made principally with a view of determining the starting and stopping qualities of the engine. The three flights were made without stopping the engine.
