NOTICES

WASHINGTON, D. C.

Washington, April 26—The government is at work on a new mortar of greater capacity and will install it at Panama when the canal is completed. The new mortars have become almost obsolete in the vermicular of the military service, and yet that form best conceals to the eye the idea the profile fired from the mortar battery. These projectiles, always fired into the air at an angle of 45 degrees or more, fired in salvo—and designed to drop from a fearful altitude with a velocity little less than that with which they left the muzzle of the mortar, are designed especially to pierce through the comparatively light armor of the decks of warships, and if possible to penetrate to the vitals of the ship before they explode.

The present style of mortar projectile weighs 1,000 pounds, and has an effective range of 10,000 yards, but is proposed soon to substitute a lighter projectile, one weighing about 100 pounds, which will have an effective range of 17,000 yards. As this is the first announcement of the purpose of the military authorities in this regard it will doubtless be received with surprise, but in the course of time this point of the new ordinance corps will be formally announced by the authorities themselves.

Ullen, N. Y., April 20—Edward Payson Adams has lent the firm 18 million words of this city, where he had resided over Sunday, at 2:15 a.m. He passed through this city at 7 a.m., facing a strong wind from the east and occasional showers.
