Subscriptions within the Boston Postal District and outside of the United States must be accompanied by postage at the rate of one cent a copy.

Printed by Puritan Linotype, Boston.

MAY 11, 1910.

The Institute Committee has at last obtained the opportunity that will show the value of general student control of those matters which directly influence student life. If they meet with the situation successfully the first solo stone of a better student body will be erected.

This development has been gradual but none the less worthy because it has been slow, and not forced, but rather a natural development it will be much more permanent.

While this is a natural development it will be not forlorn. but because of its very broad character may be given more direct representation than it has been heretofore.

Whatever may be the future, the development is one that is valuable. There are still many points to be changed up but this very fact prevents its becoming a stale "depressed" institution. The membership of the Institute Committee may be altered to make it more representative; other groups may be given more direct representation, but because of its very broad character the committee can work out its own development upward unhindered by the interpretation of words in a constitution.

Despite all the minor faults with the Institute Committee as it stands today the germ of good government is there and those who have worked so unwearyingly to attain this goal may rest assured that their efforts have not been in vain; and when they look back after graduation they will see the results of their work bearing fruit in a better Technology spirit.

The Cosmopolitan Club has finished the year with no evident intentions of being a failing institution. Here's hoping the newly elected officers will be able to advance the club to a place it certainly deserves among the social organizations.

Mr. Sandstein as president brings in the experiences of other colleges as well as countries which should enable him to accomplish great work in the advancement of the club.

SULLIVAN MACHINERY COMPANY

P. F. COPeland, '76, President.

G. W. Bateson, '03, Claremont, N. H. factory.

Matt Brodie, '09, Mgr. Salt Lake City Office.
