DRILL STARTED FOR FRESHMAN BATTALION

Dr. W. D. Lochridge, Captain, General Staff Corps Inspector.

Techno WINS PRIZE

Custer 1912, in Dayton Meet

The dinner to be given the Class of 1911 and about a stoppered, the usual custom of Freshmen-Sophomore opposed to it as a leader among technical schools. "We find no such actions in the Law School, or other technical schools, and why should we have to endure in any case we think it should be done in accordance with the Institute spirit. Prof. Fuller of the Chemical Department, it is a desirable thing and should not be allowed. Prof. Rowntree of the Mechanical Department does not object as long as the exercise is not carried on to disturb the community or injure personal comfort of the student. Prof. Seaberg of the Chemistry Department, it is a matter of personal opinion. I could not object, but would object if the course were not conducted in a spirit of sportsmanship.
