THE CHEMICAL SOCIETY.

The first meeting of the Chemical Society is to be held in the Union on Wednesday evening, October 19, at 7:30 P. M. The speaker of the evening will be Professor Talbot, who will have for his subject: "The Achievements of Chemistry in New England and What They Stand For." It has always been a great pleasure to the society to have Dr. Talbot as speaker at their first meeting. His talk should prove very instructing to all men who are interested to know the part Chemistry is playing in the world's work. It is particularly desired by the society that all members of the Sophomore class and all seniors of Courses V, VII, VIII, X, and X1V should come to this meeting, in order that they may become acquainted with the opportunities which the society provides in a professional and social way. The Executive Committee has in view a program of which all are interested and instructive, and hopes to have the active support of all the eligible men from the class of 1913.
