383 Washington Street, Boston
Catalog 45 mailed upon request.

PROBLEMS IN SECOND YEAR
PHYSICS.
Sections X, and X. 

Due Monday, October 14th, 1910.

Nos. 88a, 96, 92, 59 and 100 in last year's problem sheet.

1. If a train running 60 miles per hour is brought to rest in 20 seconds by the application of the brake, what is the acceleration? How far does it go after putting on the brakes?

2. The Kield Tower is 340 meters high. How many seconds will elapse before an arrow, shot upward from the tower with a velocity of 60 meters per second, reach the earth?

3. How far will a body fall in vacuo during the time in which its velocity increases from 8.55 feet per second to 128.5 feet per second? How long is this interval?

4. A stone is dropped over the edge of a cliff and 4.16 seconds later is heard. Find the height of the cliff if the velocity of sound is 330 meters per second.

5. An electric car starts from rest and accelerates at the rate of 25 miles an hour per second for 5 seconds. Find the acceleration (a) at starting, (b) at stoppage, and also the total time between these two conditions.

H. S. STORY, Curator.

The British Empire Association.
The British Empire are requested to give "Romeo and Juliet" this year in the Occident. The year book of the Amherst Dramatic Association will please communicate with T. B. Parker 1525 Capital.

EPISOPALIANS.
The first Tech corporate communion will be held in Trinity Church, Sunday, October 23, at 5 o'clock A. M. All Episcopalians are urged to come.

EPISOPALIANS.
All Episcopalians are requested to fill out the following coupon and hand it up to B. R. K., 43 Walter.
