PROBLEMS IN SECOND YEAR PHYSICS
Sections Xl and X2
Due Monday, October 24th, 1910.

1. If a train running 60 miles an hour is brought to rest in 20 seconds by the application of the brakes, what is the acceleration? How far does it go after putting on the brakes?

2. The Hilary Tower is 416 meters high. How many seconds will elapse before an arrow, shot upward from the tower with a velocity of 600 meters per second, reaches the earth?

3. How far will a body fall in 4.16 seconds when the distance in which its velocity increases from 5.05 feet per second to 108.85 feet per second?

4. How long is this interval?

5. A stone is dropped over the edge of a cliff and 4.16 seconds later, and in 8 seconds is traveling at a rate of 25 miles an hour. This speed is maintained constantly until within 300 feet of the next step. Find the acceleration (a) at starting, (b) at stopping, and also the total time between stations if the distance is 1 mile. How much of the distance is traversed at uniform speed?

BASKETBALL.—Owing to the non-arrival of T. A. Bennis, the position of basketball manager is now open. Any man wishing to try for the position must please communicate with T. B. Parker 1911, Captain.

ART MUSEUM.
Free tickets of admission to the Museum of Arts for the year 1910-1911 will be issued to students upon application at the ticket office at the entrance to the Museum.
