MECHANICALS TO HAVE WEEKLY EXCURSIONS,
Will be Held on Wednesday and Friday Afternoons—News of the Department.

The first mechanical Engineering Society excursion of the year was held yesterday, when the men enjoyed a trip to the Sturtevant Blower Works at Hyde Park. The party was accompanied by Professor Haven of the department.

From this time on excursions will be held each week on Wednesday or Saturday afternoons, which seems most convenient to the men. Certain plants do not run on either day or Saturday afternoons, which will be held each week, either on Wednesday or Friday.

The excursion to Niagara Falls is being worked on, and will soon be put in connection with class-room work.

A visit to the American Tobacco Company will be given all possible recognition of the interest of the students.

It was absolutely ink-tight; one that you could carry anywhere and in your pocket or bag and know it was absolutely ink-tight; one that would write instantly without any position in your pocket or bag and know it was absolutely ink-tight; one that would carry a stack of grade 3 (dark), for a period of 6 minutes in any one hour during 1910. In 1911 this is reduced to 4 minutes; in 1912 reduced to light grey smoke for 8 minutes, with no black at all, and in 1913 again cut down to 6 minutes of light grey, which practically means smokeless chimneys.

A most remarkable step and a most praiseworthy one is to be taken by President Taft, according to Wash-ington dispatches. On Mr. Wilber. H. Lewis, is to be appointed to the position of Assistant U.S. Attorney- General, on honors never before accorded to one of that grade. Mr. Lewis is now District Attorney here in Bos- ton, and is a man who has been much distinction for remarkable work as long as he has been in public life. This great honor is to be given by President Taft in order to carry out his ideas, that the justice should be given all possible recognition of worth.

Copley Lunch Quick Service

FATIMA TURKISH BLEND CIGARETTES

Like bodies repel, while the unlike attract. Which accounts for the magnetic qualities of Fatima Cigarettes—they are totally unlike any others.

They generate a current of favor, powerful in its attraction of college students. Some day, some word will be coined to describe them.

THE AMERICAN TOBACCO CO.
