TRIANGULAR MEET WITH TUFTS AND BROWN FRIDAY

Brown's Entry Received Yester-

Exciting Finish Expected

FIELD DAY

The country-attraction for Field Day is a triangular race with Technology, Tufts and Brown as com-

petitors over the Technology course. Each college will enter ten men who are eligi-

ble. The first of the series of promenade meets is to be held at their

meeting on Field Day, but which

has been run on Field Day, but which
came off last Saturday; but yesterday,
Manager Benson received the entry

from Brown and a more interesting
race will be the result. Brown is rep-

resented by an unusually fast aggrega-
tion this year, and the showing of the
Institute teams last Saturday against
the phenomenal Harvard team indi-
cates an exciting finish. Tufts is an
unknown quantity, but Captain Wil-

liams is a good man and will probably
be among the first to sight the
field.

The race will be opened at 6.30
West Roxbury, will be so timed that
the finish at the field will come be-

tween 8.30 and 9.00, and therefore
the inter-class football game, about
to be opened at the dinner. It is also ex-
pected that General Manager I. W.
Wilson, 1931, will be able to make pub-
lic at this time some of the plans
for trips and number of performances to
be given. Wilson has been busy both
inside and outside the class this year's play. He has several ex-
ceptions in store for the class, and with
a pleasant surprise to spring in the
near future.

Saturday of this week will also see the
opening of the committee meetings of
the students in the business depart-
ment. Sophomores and Freshmen are eligi-

ble for this convention. Business Manager J. L. Lenkart will make pub-
lic the details of the competition in a
day or two.

ENGINEERING PROBLEMS IN INDIA.

Irrigation Work and Industrial Devel-

opment to be presented.

Churchill's Talk Before Civil

Engineer's Institute.

The problems presented to the hy-

draulic and mechanical engineer in the

technical development of an

Oriental country will be presented to

the members of the Civil and Mechani-

cal Engineering class, and then there will be a joint

meeting to be held this afternoon in

11 B.

Great Britain has taken great inter-

est in this work in India, and there

is no other country in the world where

such an extensive system of triangu-

lations and town site plans have been

structured, such as large dams and
roadways can be. Yet it is only the begin-

ning and there remains a very large undeveloped field for the

engineer.

Churchill has been intimately connected with this work for the last

seven years, and this meeting affords a

very opportune occasion for these

meetings first hand. Mr. Churchill is a

graduate of 1899, Course II.

Following the lecture there will be a

short business meeting.

SERIES OF PROMENADE CON-

CERTS TO BE GIVEN BY

FIRST CORP CADETS.

The first of the series of promenade concerts will be held by the First

Corps Cadets will be held at their

Annual Meeting on November 17, 1910. The First Corps Band will render a concert from 8.00 to 9.00
P.M. at which the cadets will feature

(Continued on page 2)

CREW HAS MADE GOOD
SHOWING IN FALL PRACTICE

OUTDOOR PRACTICE COMPLETED FOR THE SEASON--MANY RACES ARRANGED FOR

Fall rowing practice was discontin-

ued last Monday night after a success-

ful season. The crew only entered one

race--a four-oared contest, on

Thursday evening. The crew was lost on

a flood. But the purpose of the practice
has been realized and material for two

eights has been trained for next

spring.

Over thirty-five men have shown

enough interest to come out and prac-

tice in a shell, and from these, the two
debut left vacant last year on the first

boat can be filled, forming a crew
averaging about 180 pounds and equiped with considerable experi-

ence. On November 17, was picked to race with the Harvard Club this fall, but the Union Boat

Club needed their shell, leaving only one boat, and W. S. Davis, the
captain, could not be held. This, coupled with increasing

professional engagements, which average up the river, was the immediate cause

for giving up practice until next April. We hope to have a good crew next year, and

indactions point to the prospects of rowing as a major sport at the Insti-

tute.

W. S. Davis, in rowing at Cornell, Stanford, Yale, Harvard, and Philadelphia, who are now attending the Institute, have been interested. If the crew makes as good a showing next spring as it promis-

es now, the Athletic Association may allow it a special prize to be

awarded which will promote its activities.

CALENDAR.

4.00-1914 Crew Practice.
4.00-1913 Football Practice--Oval.
4.00-1914 Relay Practice--Field.
