Office, 42 Trinity Place.
Telephone, Back Bay 2184.

All communications should be addressed to the proper departments.

Subscriptions $2.50 per year in advance. Single copies 2 cents.

Publications within the Boston Postal District and outside of the United States must be accompanied by postage at the rate of one cent a copy.

Printed by Croke Printing Co.

TUESDAY, NOVEMBER 22, 1910.

The Tech takes great pleasure in announcing the election of James Martin Burton Nesley, 1912, to the position of Advertising Manager; Algecron Tuttle Gibson, 1913, to the position of Circulation Manager; and Aaron Lee Myers, 1911, to the position of Institute Editor.

In an address a month ago before men from other colleges now taking courses at the Institute, President McClellan dwelt particularly on the subject of each man taking an interest in the different societies at the Institute of Technology.

Men who have had athletic proclivities before they came to the Institute are always welcome in Technology athletic arrangements. Our rules are that a man cannot compete for Technology until he has been a year at the Institute, on athletics.

The interest in the Combined Societies Dinner tonight seems to be confined almost entirely to the Civil Engineering Society. The meeting was originally arranged "in order to bring together the men from the different courses who would not otherwise meet each other, and special arrangements have been made in regard to a seating scheme to reach that end.

Now that final returns of the sale of tickets have been made it appears that the societies other than the Civile have not taken their proportionate share of interest in this gathering. Somewhere in the vicinity of two hundred tickets have been sold, and of these about 90 per cent. were taken by members of the Civil Engineering Society, while the others took the remainder. Just because this idea was inaugurated by the Course 1 men is no reason why a majority of the men of the other professional societies should not support such a gathering, especially since the lecture is to be on a subject of such general interest.

The Mechanical and Electrical Engineering Societies have nearly as many members as the Civile. They ought to send nearly as large delegations to the dinner tonight.

LARGE ATTENDANCE AT JOINT DINNER

Sale of Tickets Now Closed—Committee Now Arranging Seats.

Everything is now in readiness for Technology's first joint meeting of professional societies which is to occur at the Union tonight at 6:30 o'clock. A good dinner, music by the new orchestra and the host of speakers to talk on a subject of general interest to everyone, make a combination that assures one of the best evening's entertainments that we have seen at the Institute.

The sale of tickets has been suspended except in certain isolated cases, and statistics show that more than two hundred men will be present.

As has been announced, special seats will be given the fellows, and these can be found on a bulletin which is to be posted in the Union before the dinner. The visiting professors will be in with the students so that the students may get to know them better than they now do.

Everyone is urged to be on hand at 6:30 sharp.

Arrangements have been made by the University Aero Club of Pennsylvania for a series of lectures on aviation to be delivered during the winter by members of the club, of the Faculty and of other college organizations.

Columbia has acquired a station of the United States Aerometric Service. The October 1st return of the sale of tickets shows that final returns of the sale of tickets have been made it appears that the societies other than the Civile have not taken their proportionate share of interest in this gathering.
