I - some ideas about improvements, soap jars placed in the toilet room.

In order that the idea of buying new music for the Union might be made more convincing, the president asked that suggestions be made by students regarding future purchases. The president’s executive committee has been quite busy, and the new system of finances has already netted over three dollars. More magazines will be subscribed for in the near future and preference will be given to those periodicals chosen by students. The flag over the Union will be repaired and cleaned, and new soap jars placed in the toilet room.

Many improvements are beginning to show, and the social functions become almost indefinite in number. Doing the only possible, the event of the term, everyone should turn out, not only for their personal enjoyment, which could not be less than a maximum, but also to see the musical clubs are doing and to aid them spiritually. It is a fact that about two-thirds of the student body have never heard a concert by the musical clubs. Of course the programs are excusable for this, but the upper classes are not. To remedy the German inaction and poor support of the musical clubs there should be at least ninety per cent of the entire student body. Everyone lined up when reservations started and all of them have heard the best in the years. The Union Quincentenary is not so well known, but will undoubtedly hold up its end.

The discussion of this topic was led by Prof. C. H. Peabody, F. K. 1877. Among the papers to be given at the meeting of the American Society of Mechanical Engineers in New York city early in December are the "Joint Meeting in Boston," by Calvin W. Ringer, 1896, and "A New Theory of Aerodynamics" by Selby Hoar, 1904.

Later in the month, in the same city, Technology will be represented by the attendance of Lancaster Institute of Student Union by L. C. 1913, who will speak on "Dustless Concrete Floors," and by Prof. Chas. H. Norton, 1893, who has for a subject "Some Thermal Properties of Concrete."
