Gifford Pinchot
STARTS CAMPAIGN

Former Head Forester and His Assistants Will Try to Have Congress Pass Many Important Bills.

OPPOSITION TO SMITT BILL.

Pinchot Says That if It Were Passed the Government Would Be Shirk-

ing Its Duty to the People.

Mr. Gifford Pinchot, president of the National Conservation Association, is planning a most aggressive campaign for the next session of Con-
gress. It is needless to state that he will be deeply interested in the cause that he has been upholding since he was first elected to the "caretaker" official government position and that his word is of the greatest im-
portance with reference to all mat-
ters concerning conservation. Presi-
dent Taft, in his first message, advan-
taged the passage of a number of bills which Mr. Pinchot did not at-
tirely approve of. The result was that Mr. Taft was not able to have his

their form changed so they would be considered in the Senate. The bill was successful and the bills were passed to his satisfaction.

Congress last year looked into any-
things but a favorable opportunity on the part of Mr. Pinchot. It was forced, however, to yield to popular pressure in the force of argu-
ments and events. Some really good things were accomplished in that session enough to satisfy Pinchot and his lieu-
utenants. The former forester, however, is not satisfied with his new position. In a recent article he says:

"In spite of all opposition, the prin-
ciples for which we stand have been enacted into law, in a considerable number of cases, and are represented in many bills still awaiting action. More than one avenue to innumerable cravings of the people’s property has been

The Smitt bill, which has caused so much argument in the last Congress, is now on the desk of the Senate. It def-

out the country, is one of the points at which Mr. Pinchot will de-

their attack. This bill provides for the transfer of public lands to the Government and for the distribution of public lands to the

all the powers and responsibilities of the National Government with respect to water power development on lands owned by the nation. The association naturally believes that the passage of this bill would put the uses of the water power completely in the hands of big water power interests. It

also gave those precisely what they wanted and had sought for in vain in the last Congress. Congress is to be told by the opponents of the

high duty of the people to the property whose hold it must retain."

ELECTRICAL SOCIETY

FIRST TECH DINNER

Professor Jackson to Entertain

Members at the Union.

The Electrical Engineering Society will hold an informal Friday night dinner on Friday evening, December 2, at the Union. Professor Jackson will be the host of this even-
ing, and has made a special request for all members to be present.

All members, associate members, and students of the class of 1914 who are members are cordially invited to attend.
