Single copies 2 cents.

Subscriptions within the Boston Postal District and outside of the United States must be accompanied by postage at the rate of one cent a copy.

Printed by Croke Printing Co.

FRIDAY, DECEMBER 2, 1910.

We wish to call special attention to the communication in this issue regarding the elections of the Junior Prom. Committee. There ought to be a maximum interest shown by a class in the choice of its representatives. Nominations close Monday, and by that time every member of the class who has the requisite ability for the position, and is not already occupied in some other line of work of great responsibility, should be on the list of nominations. The management of the Junior Prom. calls for men of experience and business ability as much as any position among Institute activities, and the class of 1913 should see to it that the best available men from the class fill the positions on the committee.

COMMUNICATION.

The attention of the student body and especially to the members of the class of 1913 should be called to the nominations of members of this year's Prom. Committee. Little spirit has been shown so far as this most important matter. The Prom. seems a long way off, but work must be done, so let us show our interest and put men on the job who will do it well. "Technique" and "The Tech Prom." do more toward making the name of a class socially than everything else put together, and to leave the management of these activities to inefficient hands is a great mistake. The 1912 Technique Board is working well and promises the best Technique ever. Why not the best Prom. ever? Why promises the best Technique ever. The Tech Prom. is working well and to leave the management of these activities to inefficient hands is a great mistake. The 1912 Technique Board is working well and promises the best Technique ever. The Tech Prom. is working well and to leave the management of these activities to inefficient hands is a great mistake. The 1912 Technique Board is working well and promises the best Technique ever. The Tech Prom. is working well and to leave the management of these activities to inefficient hands is a great mistake. The 1912 Technique Board is working well and promises the best Technique ever.

to the Editor.

To Mr. S. P. N.:

Your last communication was published by mistake, as we print nothing of the sort without the writer identifying himself to the Editorial Board. Your most worthy opponent, Mr. Demi

Two, has identified himself according to the rules of The Tech, and if you will make yourself known to the General Manager or the undersigned, your latest offer WILL be published. The General Manager can be found in the upper office at noon, and the undersigned from 8.45 to 9 A. M., and from 1.30 to 2 P. M. daily.

MANAGING EDITOR THE TECH.

FIRST ENTERTAINMENT OF YEAR TONIGHT

Vice-Pres. Humphrey of Technology Club to Speak on "Messina and French Africa."

That the entertainment committee has started the year's work in earnest is evidenced by the fact that they have secured for the meeting tonight a speaker as interesting as Mr. Roth K. Humphrey. Mr. Humphrey is Vice-President of the Technology Club, and is a man who is deeply interested in all that concerns the institute. He has had a most wonderfully eventful career and is also an inventor of some renown.

Last year, after a tour of a portion of Africa, he consented to tell the members of the Technology Club about his trip. This account of his journey through Africa proved to be so interesting that he was asked to talk again this fall about a trip that he had recently taken to Spain. This latter talk was also decided upon by the committee, and recently he gave this talk on "A Trip Through Spain" before the Biological Society and made quite an impression on his hearers.

The subject he has chosen for tonight is "Messina and French Africa," and lantern slides will be used to illustrate the talk. Everyone should turn out and give a boost to the Friday night entertainments.

EXCURSIONS.

On Thursday, December 8, the Seniors in Course XI will make their first excursion of the year to Worcester to investigate the sewage plant at that place. This plant is under the charge of Mr. L. P. Kinnicutt, 1875, who is director of the Department of Chemistry at Worcester Polytechnic Institute at that place.

A week later an all-day trip will be made to Providence where both the water and sewage systems will be investigated. Here the men will be conducted around by Messrs. F. O. Clapp, 1889, of the Service Company, and G. H. Pratt of the city of Providence. Both parties will be under the charge of Mr. Gilbert of the Water Analysis Department.

At a recent Glee and Mandolin Club concert at Cornell the entire house was sold out in half an hour.
