A meeting of the Technology Aero Club was held at the Union last night to discuss various plans which would determine the future work of the club. The meeting was opened by the president, who made a few remarks about the poor attendance of the members on the field when there were no plans. The members themselves acknowledged that it was true that the club was no longer of much interest.

A discussion as to the practicability of building a shed followed. Various sites were mentioned, but it was decided to have a further discussion of the matter at a later meeting.

The Chess Club held a reception Thursday evening at the Technology Club. Prof. Arlo Bates read some of his delightful stories of the South. After the reading, the members took a ride out Boylston street, Boston, and visited several places.

The Chess Club will hold a meeting in the usual room of Engineering Club on Monday, at 1:45 P. M. This is a very important meeting, and it is hoped that every member will make it an annual meeting.

of Patent Office records. Our Mr. Cireeley was formerly Commissioner of Patents, and as such had full charge of the Patent Office. He urged that the practical part was as a man must know how his machine is built and how to quickly make repairs to be made upon the gliders.

Aeronautical Society, inviting the club to compete in the intercollegiate gliding contest at Squantum this summer. The members decided to have a further discussion of the matter at a later meeting.

A discussion was held some time the beginning of next term. The next meeting of the club will be held in the form of a dance to be held some time the beginning of next term.
