COMMUNICATION.

I read with considerable interest the communication published recently in The Tech concerning the towels in the Union. With the large number of men making use of the Union every day the supply of towels is entirely inadequate, and moreover, this condition of affairs has existed for the past two years. The towels become soiled and unfit for use by noon every day, but still they are not changed, but left to become a harboring place for disease germs. Why not be consistent and furnish sanitary toilets as well as sanitary drinking fountains? 

MIKE ROHDE.

Nearly 120 seniors at Yale have been given to the Yale News accounts of their expenses at College in their Freshman, Sophomore and Junior years. For the Freshman year the accounts of 114 men ranged from $115 to $2,926, the average being $1,653.46. In the Sophomore year 117 men spent sums ranging from $150 to $2,860, the average being $1,001.89. In the Junior year 113 men spent sums ranging from $150 to $2,700, and the average was $1,123.50. In considering these figures it must be borne in mind that they are taken from only a part of the class and, therefore, the averages are not absolutely accurate.

Bowdin is to have a new board track, for which the Faculty will give as much as the student body.

Dr. Adam Miller Hiltebeitel, a graduate of Princeton in 1900, has been secured by the University of Pennsylvania as an instructor in advanced mathematics. Since the opening of the college the authorities have been looking for a man to fill this position, and decided upon Dr. Hiltebeitel as a man who was both a scholar and an able teacher. Princeton was also desirous of securing Dr. Hiltebeitel's services, but he finally decided in favor of Pennsylvania. Dr. Hiltebeitel, after his graduation, taught in his Alma Mater a year and a half, and received his doctorate there in 1905. From this date until 1906 he taught mathematics in the Berkshire Academy. Last year he spent in Germany studying his profession.

Lots of people never worry about style. Just buy FOWNES GLOVES and hit it right.

WINCHESTER

Repeating Shotguns

U E D IN THE U. S. ARMY

The U. S. Army authorities know a gun; that is why, when they decided to equip some troops with repeating shotguns, they selected the Winchester in preference to all other makes. The reports of the U. S. Ordnance Board also assure a gun; that is why after selecting a Winchester Repeating Shotgun to all sorts of tests, they pronounced it safe, sure, strong and reliable. If you want a shotgun—buy the one whose strength and reliability are proved—The U. S. Ordnance Board to endorse it—that's the Winchester.
