The administration of public works

Society of Arts Heals Talk By Louis K. Rourke, 1889,
Civil Engineer.

Keynote is Efficiency.

He urges concentration of power and ability to handle workmen.

Last evening the society of Arts held its first meeting of the year in their new quarters, located at 125 University Ave. The society has been in existence for over 50 years, and has been known for its dedication to improving the quality of life in the city of Toronto.

Mr. Rourke, the featured speaker, spoke on the subject of efficiency in public works. He emphasized the importance of concentrating power and ability to handle workmen in order to achieve the best possible results.

He pointed out that, in order to achieve efficiency, it is necessary to have a suitable man in charge of a suitable man, the department of the city engineer, and the methods of manufacturing.

Under Mr. Rourke, the society has been able to achieve great success. He has carried into effect a number of reforms which make for increased efficiency, by this means there was increased. By this means there was increased. By this means there was increased.

He has made it possible for the people of the city to have their water needs cleansing and then be able to enjoy it. The beauty spot that it had once been the people of the city can now enjoy it.

On the evening of the society held a business meeting. At the conclusion of his talk the speaker was given a vote of thanks.

The following numbers were given during the year:

Mandolin, Glee and Banjo Clubs Participate—Dances Follows Concert.

Before a packed house of most enthusiastic members, the Tech Musical Club gave their first concert of the year at Norumbega Hall in Auburndale.

EIGHT NUMBERS RENDERED.

Mandolin, Glee and Banjo Clubs Participate—Dances Follows Concert.

At the last biological society meet-}

ing, Mr. W. H. Johnson, C. E., of the class of 1889, gave a very interesting and instructive talk on "The Purification of Waters Using Manufacturing Wastes." Mr. Johnson, who has been in business, has been connected with the waste disposal of manufacturing wastes. The case of the Neponset river in Braintree shows the interest taken by the public at large in the disposal of these manufacturing wastes. Along this river all kinds of dirt, putting into it millions of goods, coming down in every day, pollutes the air, and then the time the river reaches Hyde Park, it is a million miles away from it.

The beauty spot that it had once been the people of the city can now enjoy it. The beauty spot that it had once been the people of the city can now enjoy it.

Mr. Johnson pointed out that this field was a virgin one for the manufacturer. The people of the city can now enjoy it.
