(Continued from Page 1.)
About 1900 he was given the position of chief engineer in building railroads in South America. From this position he advanced to better ones, until he became the first assistant to the chief engineer on the Panama Canal, and had charge of the Culebra division.

Mr. Rourke is a man who is always looking for improvements in the executive management of engineering undertakings. This is clearly shown in his reorganization of seven departments on the canal into three departments, and putting men of wide experience in charge of each department. When Mr. Rourke came to Boston last year he combined the engineering departments into the "Department of Public Works."

It is not very often that Mr. Rourke has the time to speak before non-professional societies. Therefore everyone should attend the meeting to show Mr. Rourke that we appreciate his kindness in addressing the club.

The meeting of the club will start with a supper in the upper dining room in the Union, at 6 P.M. Following the supper Mr. Rourke will address the club, and then a business meeting will be held. The dance committee will make a preliminary report, and will probably announce the date to leave early.

(Continued from Page 1.)

Mr. F. C. Pillsbury will speak on "Road Construction and Maintenance.

This week, Wednesday, at 4:15 P.M., there will be a meeting of the Civil Engineering Society in Room 11, in Eng. B. F. C. Pillsbury of the Boston Division of the Massachusetts Highway Commission will be the speaker, and a most interesting lecture is promised. The topic to be discussed is "The Principal Methods of Road Construction and Maintenance," and the various points will be illustrated by blackboard diagrams.

Mr. Pillsbury will answer any and all questions which may be raised by the members.

The necessity of raising the standards and pay of the workmen employed in highway construction is a pressing one, because at the present time the public is asking for new high standards in roads.

The chief business of the society will be to elect a new vice-president. The sample of the new pin will be shown and passed upon.

Those who expect to enter it should meet about 8 P.M., and give the members who live out of town the opportunity to show Mr. Rourke that we appreciate his kindness in addressing the club.

Everyone should attend the meeting to show Mr. Rourke that we appreciate his kindness in addressing the club.

CIVIL ENGINEERS
WILL HAVE LECTURE

Mr. F. C. Pillsbury will speak on "Road Construction and Maintenance."

This week, Wednesday, at 4:15 P.M., there will be a meeting of the Civil Engineering Society in Room 11, in Eng. B. F. C. Pillsbury of the Boston Division of the Massachusetts Highway Commission will be the speaker, and a most interesting lecture is promised. The topic to be discussed is "The Principal Methods of Road Construction and Maintenance," and the various points will be illustrated by blackboard diagrams. The chief business of the society will be to elect a new vice-president. The sample of the new pin will be shown and passed upon.

Doors will be closed at 4:15.

C. E. SOCIETY PINS.

The sample of the Civil Engineering Society pin has arrived, and the whole order is expected to be here by Thursday. Thirty-seven orders for pins were received and the committee ordered an extra hundred. The pin is of a very pretty design, and the committee expects that after the men have seen them they will have to order a second lot.

With each package of Fatima you get a coupon, 25 of which secure a handsome felt college pen. Select 100.

Fatima Cigarettes are banded on the north by quality, on the south by individuality, on the east by mildness and on the west by value. In all the world no smoke just like 'em.

They compass much of the earth, giving much pleasure and satisfaction everywhere.

College men say they're "different."

Inexpensively packed in order to give you 20 for 15 cents.
