COMMUNICATION.
I should like to be allowed to use
of a little space in the columns of
your most worthy paper for a few comments on, and offer a few suggestions to the Calendrical Com-
mittee. The most noticeable recent case of
doubling up of several events oc-
curred on Wednesday night, when
there were four "big" meetings pulled
off, the basketball game with Boston
College, a big Chemical Society meet-
ing, a Mining Society dinner and a
Catholic Club meeting. Now, while
the Chemists and the Miners might
not interfere with each other, they
both would with the basketball game
or the Catholic Club. It is plain that
the purpose of this committee is to
arrange the dates made by the dif-
f erent activities and see that they do
not conflict in any way. And this was
the object of the formation of the com-
mittee why it is allowed to go on in
this shiftless, do-nothing way? There
is certainly a great need for a good
committee of this sort here, and it is
a shame to have things go on in
this way. If the Calendrical Com-
mittee, as at present constituted, has
not the time to do this work and do it
well, it would be a very humane and
public-spirited act to resign from
office and have a new and more ef-
ficient committee organised. Let us
hope that the new year will bring a
new order of things so that we shall,
for a certain extent, at least, have
different nights assigned to the giv-
ernent activities whenever they arrange
activities and see that they do no
conflict in any way. As this was the
object of the formation of the com-
mittee why is it allowed to go on in
this shiftless, do-nothing way? There
is certainly a great need for a good
committee of this sort here, and it is
a shame to have things go on in
