Messrs. E. R. Hall and T. H. Haines, Seniors in Course II, have just completed a test on part of the Richmond street plant of the Quincy Market Cold Storage and Warehouse Company, in connection with their thesis on Efficiency Test on a Complete Refrigerating Plant.

The system tested was of the absorption type, and consisted of the De Laverne Company, and the other by the De Laveno Company, both being driven by Harris-Corliss engines. The absorption machines are of the Car- bendale type, one of 150 and the other of 50 tons capacity. The boiler plant contains in all four furnaces, 42 boilers, and Foster superheaters, and has a total rating of 160 boiler horses.
