EMPLOYER'S RELATIONS TO HIS EMPLOYEE

Mr. George A. Flynn, Corporation Counsel for Boston, Will Speak.

At CATHOLIC CLUB MEETING.

Subject of Industrial Accidents Being Studied With Great Interest by Employers and Employees.

At the fifth regular meeting of the Catholic Club, which will be held next Wednesday, January 12, at 8 P. M., in the Parlor of the offices of Mr. George A. Flynn, assistant corporation counsel of the city, is to give a very interesting and timely lecture on "Industrial Accidents and the Relation of Employer to Employee." This lecture will be of especial interest to us as on account of the recent steps taken to bring the employer and employee into closer relations, and which has resulted in better protection for the employees.

This subject is being studied with great interest by all employers and their counsel and experts, and their efforts to treat their employees fairly is shown in the Massachusetts State Legislature this year. Mr. Flynn has made a special study of the liabilities resulting from accidents and workmen's compensation, and without doubt, gives a very interesting and most instructive lecture.

This meeting will be the last one before the annual address and will be held in Whitney Hall, Brookline, on Wednesday, February 8. It is, therefore, important that all members attend. The dance committee wishes to announce that anyone who wishes to have invitations sent to his friends must hunt in the names and addresses to J. A. Herlihy, Box 30, Cottage, Saturday, January 14th, at that latest. This is important as the invitations are to be sent out next week.

CIVIL ENGINEERING PINS HAVE ARRIVED

Long Delayed Pins Heartily Approved by Society.

After some delay the pins and boxes for the Civil Engineering Society arrived yesterday morning. For the past few years the society has been considering the question of pins, and at the beginning of the year a committee was appointed to look into the matter. Dean Burton and Professor Allen of the Department of Civil Engineering suggested a very good design which was approved by the society. The greatest form of the pin is a section of a level rod in silver, with a Boston target in red and gray enamel. On the target is the inscription: "Civil Engineering Department, T. P. C." It is raised letters. The whole design is very neat and represents very well the idea of the society, as the level rod is the most universally used instrument in the profession.

The price at which the pins were sold was $1.50, a price which is not unreasonable, due to the large order, the pins coming to dealer in quantity at the cost of fifty cents for the dollar for the lots. Some dissatisfaction was expressed by some who later discovered that they had been mounted upon poor level, and therefore, probable that they will be changed.

Are you a candidate for those theatre tickets this week? There is still plenty of time to start if you haven't already.

Tech Show, 1911, is soon to issue a call for music writers.

VARSITY BASKETBALL TEAM.

TECH BASKETBALL TEAM PLAY BROWN

Hard, Fast Game Expected On Saturday Night at the Gymnasium.

BROWN FAST TEAM.

Second Team Will Play the Boynton Five Between the Halves.

The next game on the basketball schedule is that with Brown University here in our own Gym on the 14th of January, next Saturday. The squad will be in fine condition for that game and will in all probability play a better game than they have at any time this season. The Second team will go against the strong Boynton five, a local team with a good reputation at present.

Brown has always been a hard reception for the institute teams to handle in any sport, but it does not out the basketball team should get away with a victory this year in their own gym as it is. The Colgate University of New York and Harvard, which is playing Brown in their last game of the season, could only pull out with a six point lead for several days only and which is the team, though itself was playing the last part of the time. Sprinkling the star football and basketball player, is not playing this year for faculty reasons, and his place is hard to fill. The men are not as strong as they should be and the game, their first of the season, was rather slow. Captain McKay was the star of the evening, and is playing the same old game of forward that will be remembered by all those who saw the Brown game in the Gym last year.

Captain Parker gave the team a hard workout just before the Gym, and the Seconds had more trouble than ever before in their efforts to prevent a varsity scare. All the men went through the Dartmouth game in fine shape, for there is no reason to fear any injury to be found on the squad. They seemed to find the basket with almost machine-like regularity, and very few played as perfectly as "Bill" Hargraves was at practice again and spoke highly of the work the team did. He has been away for some time and he says that they have made a great deal of improvement. While he has been absent, Parker has fully recovered from his Chests trip and is again shooting with his usual cleverness. The whole team played with a snap that has been lacking for several days, and as they are very encouraging to the management.

MAN-FLYING KITES AS WIRELESS STATIONS

First Experiment Made in Los Angeles By S. F. Perkins of Boston.

MAY BE USED AS TARGETS.

Sharpshooters in Aeroplanes May Be Trained by Their Use.

In the future, the men-carrying kite is going to be one of the principal instruments of warfare if the experiment of Mr. S. F. Perkins of Boston at Los Angeles, lately, is any index of the matter. The principal reason for the use of this kite is it's serviceability as a wireless telegraphy station. In the experiment that is referred to the aerial was carried several hundred feet, and it was easily convertible into a quick and efficiently wireless station could be established in time of war. Another use of the man-carrying kites is that of a target for the practice of sharpshooters carried in aeroplanes. The kites can be made to bob about so as to cause the sharpshooter to keep on the alert. Life-sized dummies are attached to the kites as a further target.

CARNEGIE TRUST CO. WAS UNAIDED

Conservative New York Banks Seemed to Recent Coming of New Interests.

In regard to the closing of the Carnegie Trust Company the New York Commercial comments as follows: When the run on the Carnegie Trust Company was started other banks and trust companies did not offer to come to its aid. The weakly bank statement and the bank in the civil engineering profession and the public was a decrease in loans of $2,000,000.

When the president of one of the large banks was asked why the Carnegie company was not helped when the bank statement showed the condition, he said: "A farmer picks a bad apple out of a barrel to save the others." Here the trouble of the Carnegie company and the anger that contem- plored the trust institutions were laid in large part to jealousy. It was said that the old and conservative institutions in the financial district re- served the coming into their field of a

(Technique Electors for 1913 Are Chosen)

Twenty-five Men Elected to Committee — Birdham Member Ex-Officio.

Meeting Thursday Afternoon.

Very Good Material in 1913 From Which to Choose Technique Board.

The following men were elected to the Technique Electoral Committee of the class of 1913 in the election which closed Saturday at noon:

J. C. Hart
E. Rogers
H. M. Rand
R. D. Thompson
F. P. Capen
W. R. Irby
R. H. Hersey
W. de V. Kateenberger
A. R. Atwood
C. F. Cairns
T. R. Kester
J. J. Strichan
W. L. Whitehead
R. O. Glidden
R. W. Rinch
S. M. Butler
H. N. Gage
C. A. Harkness
A. R. Hewlett
R. Knight
P. C. Warner
A. F. Brewer
R. W. Brewster
W. N. Eichholz

President H. S. Birdham is a member of the committee ex-officio, and it is announced that he will call a meeting of the newly elected committee members Thursday afternoon at 4 o'clock, in the Union. The men above named have in their hands the choice of those who will take charge of the 1913 Technique. The name of every man in the class is considered in this election, and if a man to be considered is on the committee he has to leave the room where the members are. The committee has an abundance of good material from which to choose the editors of its year book so the 1913 annual should be a good one.

Calendar

Tuesday
1.00-Technique Meeting (with lunch)-Union.
1.30-Union Committee Meeting—Dean's Office.
4.00-Glee Club Practice—Union.
