Subscriptions within the Boston Postal District and outside of the United States must be accompanied by postage at the rate of one cent a copy.

Printed by Crooke Printing Co.

TUESDAY, JANUARY 10, 1911.

Rumor again comes to The Tech concerning politics in the Sophomore class, this time in connection with elections to the Technique Electoral Committee. Stories of combinations, personal appeals, the button-hole system and other methods of the political lobbyist are rumored about the Institute. The call is now repeated with especial insistence, and especially members of the lower classes will be welcome in this work, as there will be no examinations during the short respite after the holidays. Those who take advantage of the committee will be glad to meet anyone interested and give details as to assignments, commissions, etc.

IN THE LIMELIGHT.

The Civil Engineering Department looks like the milky way. Oh you C. E. men, plase.

H. S. Benson got the tickets for last week's "Limelight." Who next?

One man in the Union tonight and he is studying.

The luncheon served at the Women's Association last Saturday must have been great—ate least the chicken pie last night was extra good.

Save Saturday night for the Tech-Brown game at the Gym.

More six days.

Have you as many exams as the rest of us? If you haven't you might give me a little dope for The Tech. It will be highly appreciated.

ALL FOOLS ARE NOT DEAD YET!

(From one of the Boston Dailies.)

Technology students who have been specializing in science are trying to solve a problem that arose in front of their building last Saturday evening, when the forward wheels of an electric car started down Boylston street, while the rear wheels were headed in the direction of Huntington avenue. They cannot yet understand why, when the power was reversed and an attempt was made to back the car, the rear wheels went forward. If the backing up process had been continued the car would have turned round in a circle.

FLUID CRYSTALS TO BE DISCUSSED

Prof. F. M. Jaeger of University of Groningen will Lecture in Lowell Building.

Professor F. M. Jaeger of the University of Groningen, Holland, will give an illustrated lecture in Room 6, Lowell Building, at 8 o'clock on Thursday, January 12, on "Fluid Crystals." This is a subject that is interesting chemists the world over, and it is an exceptional chance for Institute men to enlarge their knowledge in that direction. Professor Jaeger's lantern slides are said to be much out of the ordinary, and this will add to the interest of the talk.

FOWNES

GLOVES

are service gloves—wear long and look well while they wear.
