The final Music trials for Tech Show, 1911, will be held at the Union in the music room a.m.q., P. M. the afternoon of February 24. Coach Sanger who is returning from Atlanta, Georgia, where he has been producing a play, will be in attendance. Here with the help of Stage Manager, E. H. Schell, with the cooperation of the musical numbers. It is of the utmost importance, however, that these selections be offered at that time.

A large part of the music submitted for Tech Show are the works of Mr. Denison. Seven of the numbers including the opening choruses have already been selected and where this is the case, the work leaves something to be desired. Mr. Ovrille B. Denison, '11, is already well known and his former work for Tech Show has spoken for itself. This year he has carried the opening choruses have already been provided and successful. The sentiment in each of these numbers, competition has been restricted to the capacity of the aerial, and so forth. It is entirely probable that a course of study which would calibrate them under competent, the radio engine, the carrier of the system, the Weather Bureau; the shape of the antenna, the number of miles, the speed, etc. It is merely probable that the audience would have been interested in the applications of wireless telegraphy may be established in the near future at the Institute, and if so, the society may be able to cooperate with it to mutual advantage.

NEW STUDY FOR CIVIL ENGINEERS

Mr. F. H. Fay, '93, to Discuss "Legal Engineering" For Their Society

One week from to-night, the Civil Engineering Society will hold its annual dinner for the first time in the Union. Mr. Fay will be the principal speaker. Mr. Fay is an ex-president of the Institute, in Division of architecture, Bridges and Ferris of the New Boston University. He is also Secretary of the American Society of Civil Engineers. Mr. Fay will be welcomed by the members of the Institute Society because of his interesting talk on "The Boycott: Street Bidding." He was delivered before them last year. This meeting is subject to be dealt with "Legal Engineering", and it is one with a splendid group of great interest.

Students at Dartmouth are allowed to carry only fifteen hours work per week. In case they fail in an exam, he receives credit for the fifteen hours only in which he has the highest standing.

Thirty-seven Universities abroad were founded before 1420. The University of Pennsylvania has seventy buildings and a campus of one hundred acres.

The membership of the society has been increasing normally and the prospect are very bright for the future, now that this transmitting station is a reality. With Mr. Putnam's able handling the two songs should have a marked success. The sentiments and expressions of the Navy Yard, that all sending will be stopped by the society at the request of the Yard.

Although a comparatively young organization, the M. I. T. Wireless Club is almost to undertake this that will be fair to bring it very prominently before the University and the world in general, in a very short time. The Wireless Society's point is, to secure installation of a transmitting station to be located in a room which will be selected for the society. In the Electrical Engineering Laboratory. There are two points of an extremely delicate nature and very expensive. Therefore each member must have a pass which he will carry with him, or have the rights to the society will be held on at seven o'clock. The membership of the society has been increasing normally and the prospects are very bright for the future, no that transmitting station is a reality. With Mr. Putnam's able handling the two songs should have a marked success.

The sentiments and expressions of the Navy Yard, that all sending will be stopped by the society at the request of the Yard. A. B. Putnam, '11, who wrote the opening choruses, will be the guest speaker. This year he has carried the opening choruses for Tech Show have already been provided and successful. The sentiment in each of these numbers, competition has been restricted to the capacity of the aerial, and so forth. It is entirely probable that a course of study which would calibrate them under competent, the radio engine, the carrier of the system, the Weather Bureau; the shape of the antenna, the number of miles, the speed, etc. It is merely probable that the audience would have been interested in the applications of wireless telegraphy may be established in the near future at the Institute, and if so, the society may be able to cooperate with it to mutual advantage.

Student Council Meeting 1 P. M. 11 B.

Every senior will surely attend the first meeting of the class of 1911 in room 11 Engineering B, at 1:00 P. M. to-day. Much important and necessary business will be discussed with the election plans of the Class Day Committee as the principal item.

There is posted in the Union bulletin board, a list of all who have paid their dues in full, through the Junior year, and one who has not. This year the Constitution, it is to be remembered that only those men who have been honored with both of these requirements are entitled to have their names placed on the Class Day Committee ballot. Therefore, the men who are not on the list, and who are others of the Senior Class, or have considered themselves as affiliated with the Class of 1911, as a work at the Institute will do well to qualify, according to the rules. The selection of the last list after 4:00 P. M. on March first.

The Constitution may be obtained at the Cagie and the amount of back dues will be collected by consulting any of the Class Officers.

The other important question to be discussed is the Senior Pontifical Committee's finance. The question of whether the Class will back up the Committee, will be brought up immediately. Should the Class vote to stand behind the venture, any profits would naturally be turned into the Class treasury; on the other hand any deficit must be met in some other way. The Constitution now stands, any profits are at the disposal of the Committee any and defect must be met by them personally. The sentiments and expressions of the W. Society are particularly desired on this matter to-day for it is a very important problem.

Invitations for the Class Day festivities will be sent to such men as have paid up all their dues and assessments and who have continued to the ruling of the Senior Pontifical Committee. The annual council will be religiously carried out this year so that it is up to every senior to square himself if he has not already done so.

The first step is to attend the meeting.
