THE THURSDAY MARCH 2, 1911
SOCIETY OF ARTS MEETING ON FRIDAY
At eight o'clock on Friday night, March 3, the Society of Arts will hold a meeting in Huntington Hall. The lecturer of the evening will be Professor Edmund B. Wilson of Columbia University. The subject of the address will be "The Physical Basis of Heredity." The talk promises to be of great importance, and the fact that the public is invited makes it seem certain that there will be a good attendance.

COMMUNICATION
The following letter has been received by The Tech for publication.

Dear Sir:

At the meeting of this Society held Monday evening it was voted to join with the Electrical Engineering Society in celebrating the fiftieth anniversary of the founding of the Institute, if we believe the proposed joint dinner to be an excellent method of fittingly celebrat-ing the occasion and we hope that the various professional Societies will enthusiastically assist the Electrical Eng. Soc. in the preparations for the affair.

We would suggest that a committee composed of one representative from each Society be chosen at once to co-operate with the E. E. Soc. in completing the arrangements.

Yours very truly,

Oliver D. Powell.
Secretary.
