Enjoyable Evening Spent at Boston City Club Rooms

TUFTS AND HARVARD MEN PRESENT

The Civil Engineering Society of Technology together with those of Tufts and Harvard was given a reception last evening by the Boston Society of Civil Engineers in the rooms of the Boston City Club. The President of the Boston Society welcoming the future engineers, extended to them an invitation to attend any regular meeting of the Society. The speaker of the evening, Mr. J. B. Francis, consulting engineer for the Pennsylvania R. R., was then introduced. His talk was the New York terminal of the Pennsylvania R. R., illustrated by lantern slides, proved very interesting as it gave many details of the work which are of great importance to young engineers. The building of this terminal, the greatest engineering work of its kind in the world, extended over a period of nine years. The tunnels under the East and North Rivers were very important parts of the work and presented many interesting and unique engineering problems. The terminal itself occupies an area of twenty eight acres which was obtained by razing over five hundred buildings. Before actual work on the structure could be begun, bridges had to be built over eighty and ninth avenues and thirtieth streets. This was a very difficult problem as the bridges had to be built strong enough to bear the weight of elevated trains. The actual structure is a very beautiful building of mastic and granite and is the finest R. R. station in America. As the close of his lecture, Mr. Francis gave out pamphlets describing the building.

Refractions were then served and the remainder of the evening were spent in songs and cheers.

Now's the time to come around to the Union and get admission tickets and invitations. The time is coming when there will be a crowd around the desk, so come now. Avoid the rush, and give the committee a gift.

Too much stress cannot be laid upon the necessity of reserving adjutings seats now. If there are any groups of men, who want to sit together at the Prom, it is absolutely imperative that they have word at the desk at once.

No, it is not too late to sign up.

In case you have any offers still open for the excursion, you can have your name at the desk and you will be put in touch with men who desire chairs.

Be sure and bring your stub with you when you come to the Union.

Invitations are ready.

Freshmen and Sophomores are not taking advantage of their opportunities if they miss the Prom.

Two more weeks to April 21.
