THE TECH

Published daily, except Sunday, during the academic year at the Massachusetts Institute of Technology.

Entered as second-class matter, Sept. 29, 1904, at the Post Office at Boston, Mass., under the Act of Congress of March 3, 1879.

Managing Board
S. E. Bates, 1911 General Manager.
G. M. Keith, 1917 Editor-in-Chief.
E. F. Ferris, 1912 Managing Editor.
H. W. Hall, 1912 Business Manager.
A. L. Myers, 1911 Advertising Manager.
A. E. Gillson, 1912 Circulation Mgr.

News Board
L. W. Chandler, 1912 Athletics.
A. J. Hackett, 1912 Student Affairs.
A. J. Fassett, 1913 Societies.
M. Parke, 1913 General.
C. A. Calkin, 1912 General.

Business Board

Staff
D. A. Tomlinson, 1913 E. W. Mann, 1914 M. Lewis, 1913 E. Steele, 1914 E. L. Hall, 1913 R. P. Harrett, 1914

Business Staff

Art Staff
W. S. Coutts, 1912 R. H. Noyes, 1913 Photographers
E. C. Taylor, 1914

Office, 42 Trinity Place,
Telephone, Bay 211
All communications should be addressed to the proper department.
Subscriptions $2.00 per year in advance.
Single copies 25 cents.
Communications within the Boston Postal District and outside of the United States must be accompanied by postage at the rate of one cent a copy.

Printed by Masque Printing Co.,
The Engineering Record is published weekly, at $3.00 a year.

Congratulations
Due the Communication Engineering Society and the Committees in charge of the program in charge of the program and for the able manner in which the dinner was conducted. The affair was certainly worthy to be the representative undergraduate orientation of the Semi-Centennial and the "New Technology". That's all you need to know about it or whatever.

The Engineering Record is published weekly at $3.00 a year.

Students of Civil Engineering
You should read the ENGINEERING RECORD in connection with your studies. It describes engineering works which exemplify the best practice in design and construction.
It will keep you in touch with the work of the leaders in all branches of civil engineering and construction.
It will make clear the practical applications of the engineering principles you are studying.
The RECORD is devoted exclusively to subects of interest to civil engineers.
Its volumes contain an immense amount of valuable technical and practical information on engineering work.
You should have this information on file for future reference.
Some day you will need it in your work.

THE TECH, BOSTON, MASS, APRIL 13, 1911.

Continued from Page 1.

President Ferris next introduced Dean Boston, who enlivened the occasion with a few jokes including a jab at his colleague in the handling of students, the Bürgermeister. He said that the latest from the newspapers was that the "New Technology" was built in the "concrete" but not the "abstract." He emphasized the fact that gathering together of the various units, namely, the various professional societies, into one strong unit was as much a secret of success as is concentration of a subject. He quoted from Prof. Rich-}

iers, "The New Technology," about the keynotes to success is integrity.

Dr. Rand, the next speaker, opened with a few stories to get equal with the Dean and then continued in a more serious vein. He spoke of the business and commercial opportunities open every day to Tech men, how Tech men have stepped into them and made good to a very marked degree. He gave examples of business who stated that they employed scientific men in their commercial enterprises because of their ability to take up any problem put up to them and to carry it out with a success unequalled by any other class of men available.

Fen. Maclaurin was greeted with a rousing M. I. T. cheer as he arose to deliver the closing address. He began by stating that the problem of deciding on a new site was practically settled and the announcement was now only dependent on the action of the Legislature and the Governor with respect to the state appropriation bill now before them. He announced that there was no doubt that the site of the "New Technology" would be definitely announced before the class of 1911 received their sheepskins. He felt that the idea of getting together as represented by the getting together of the professional societies at this meeting was one of the greatest aids to success in the scientific world. Science as it is now developed and still increasing in its enlargement makes it easy for men to get together it has increased the number and variety of vocations and enlarged the aspect and outlook of the coming generation. In the old days real scientific men practically all branches of engineering, Biology and Chemistry. but now in order to be a success, the men in science have to find their forte and specialize in order to be successful. In doing so again emphasized the importance of getting together and combining ideas in scientific lines to be very important both scientifically and socially.

After some singing and general good fellowship in the upper room the assembly broke up saying farewell to one of the most pleasant of the year.
