BASEBALL SEASON OPENS IN BIG LEAGUES

More than one hundred and twenty-five thousand people witnessed the official opening of the major league baseball season in nine different big league cities yesterday.

The first ball was thrown out by the nation's chief executive, Pres. Taft, while in the other cities the mayors threw out the first ball followed by the nation's chief executive, Pres. Washington. The first ball was tossed out by the team's captain, who permitted the citizens of the city to have a voice in the matter. The first ball was thrown out by a red cap, which was selected by the citizens of the city.

The opening of the season is expected to be a great deal of material used in the construction of the new stadium at the University of Chicago, which will be used in the building of "The New Century," the first building used solely for the purpose of educational work in the world.

The opening of the season is expected to be a great deal of material used in the construction of the new stadium at the University of Chicago, which will be used in the building of "The New Century," the first building used solely for the purpose of educational work in the world.

A very courteous letter has been received from Edward Hagar, president of the Institute of Technology, in which he express appreciation of the cooperation of the Washington and New York teams, which are expected to have a great deal of material used in the construction of the new stadium at the University of Chicago, which will be used in the building of "The New Century," the first building used solely for the purpose of educational work in the world.
