PUBLICATIONS OF THE UNITED
STATES GEOLOGICAL SURVEY

A new list of publications of the United
States Geological Survey, just is-
sued, contains the titles of more than
a thousand books and pamphlets. These
reports cover a wide range of subjects.
They include not only papers on geology
and topography but reports on water
resources and on technology. The
Geological Survey was the memory of
the United States Reclamation Service
and the Bureau of Woods, which now, in
full growth, are carrying along success-
fully work begun by the Survey years
ago. The Survey, however, still con-
tinues its work on water resources and
issues discussions of resources in its
annual volume "Mineral Resources of
the United States."

A glance at this list will show the
great diversity of the subjects consid-
ered and the manifold nature of the
science of geology. The reports include di-
scussions of geologic chemistry, mineral-
ogy, petrography, and paleontology, as
well as depredation and other matters of
very practical importance. Much of the
Survey's late work has been di-
rected to the study of mineral deposits
of economic value. The work done in
land classification has not yet found de-
dicated expression in the Survey re-
ports, but some papers prepared as a result
of these classifications have been
printed annually in bulletins entitled
"Contributions to geology." The list may be obtained by
writing to the Director of the Survey at
Washington, D. C.

ARCHITECTURAL SOCIETY
RECEPTION WEDNESDAY

One of the first events in Junior Week
will be the reception of the Architec-
ture Society on Wednesday afternoon.
All preparations have been made for a
very enjoyable time. The entertain-
ment will be Mrs. Despradelle, Mrs.Sedgewick
Mrs. Jackson and Mrs. Cox. Hanging
in the different rooms will be the work
of the various classes in design from
modeling, drawing, water color and pen and
gouache. There will also be many carvings
of different members of the Society to
add to the decorations.
As a side issue there will be a short
play presented by a cast of seven of
the Society. This play will be given in the
Studio on the top floor of Pierce Build-
ing at 9:15. The "Scene" has been
made in the department as has the play.

Many invitations have been sent out
and it is expected that a large member
of the friends of the Society will avail them-
selves of this opportunity to see the work
of the department as well as to spend an
enjoyable afternoon. There will pro-

Professor RATES on SUFFRAGETTES

Prominently placed in last Sunday's
Boston Herald was a poem by Prof. Alek
Bates entitled, "An Epistle to Alexander
Pope in Elysium." Pope has occasion-
ally asked for news of the present day
world and Prof. Bates replies in verse,
making it a hit on suffragettes.

"For and against, and then against and
for In hollo argument move pen and jaw
While like a rock which futile sages ven
Remains unchanged the argument of
SEX.

All that's to say is said in that one word
To look for further argument absurd." He sends a warning to the suffragettes in
these terms:

"Once more will tell the selfish bade
her down
And give the slave's robe for the aban-
doncd crown.
By bitter buffets from the tragic real
Will she be paid who murders man's
ideal."

As a conclusion to be drawn Prof. Bates
takes the following:

"I know not if they'll vote, but if they
do, They'll end by voting as men tell them to."

EXPRESSIOH OF GREATNESS
BY NUMBERS

Frederick A. Woods, an occasional
reader on theoretical biology at the
Institute, has an article in last week's
Science in which he attempts to show that
greatness can be expressed in ratios from
greatness ,in its true sense.

C. E. TRIP, LIMELIGHTS

Captain Allen of the King Philip said
that the Civil Engineers were the quaintest
"bench" he has had on his boat for eight
years.

"Talk about your "Unions "sawdusted."
One of the fellows bought one and
he did not like it, he threw it over board.
A fox came up and nibbled at it and was
soon suddenly turn on his back.

There was one grand rush for the drug
store at Saganmore and the clerks were,

1. A modest package— but
then, you get ten adic.
2. Good cigarettes.
3. Figure on getting 20
or 15 cents.
4. The AMERICAN TOBACCO CO.
