LAST NEWS OF TRACK MEN BEFORE BIG MEET

Today at Providence (only fifty miles away) our Varsity Track Team goes against the Brown team in a meet that promises a very close affair, and there are practically no meeters under the Cardinal and the Gray because of the lack of interest. The meet begins at two-thirty and will probably be over in time to get the five o’clock train back from Providence.

The track leaves at two o’clock this morning so that they may be roped from the car ride and the best possible condition when the first gun is fired. Brown is out for the victory but there is not much chance of her getting it if all men show up as well as have in practice. Coach Keaney refuses to give out a statement see the final result but he is weighing a look that could hardly be called worried. He has said that the meet will be very close but we are all hoping Tech to win by the small score.

There should be a large bunch of fellows go with the team on a trip like this where the meet is such a short distance away but they have decided not to go. Therefore it is up to those who do go, to make just as much noise as though everybody went and back the team to the same extent, if possible. The special train train has of course fallen through, but there is lots of team at the regular and all who can, should be sure to go. Get there there and yell, the Dean said, till you can’t see straight any more. You can’t very well lack the Crew but stay with the Track Team to the limit, they will show their worth.

To the Editor of the Tech:

May I ask a space in your valuable columns for the following communication from the matter of which can not but appeal strongly to every Tech man and the fellow with some character as affecting seriously the future of the Institute at large? Lately, a number of undoubted preachers have been brought to notice at the Institute, among a few of the men who, whether wrongly or rightly gainsays to call themselves Tech men. Now that only those who are ever having the interests of the Institute at heart, and are ever reasoning from good names with a view to all future years, can really be called Tech men. We all know without doubt the one reason why we come to the Institute. Simply the word “Sue.”
