In Charge of this Issue. A. H. Waite, '14.

Office, 42 Trinity Place.
Telephone, Back Bay 2184.

All communications should be addressed to the proper departments.

Subscriptions $2.00 per year in advance. Single copies 2 cents.

Subscriptions within the Boston Postal District and outside of the United States must be accompanied by postage at the rate of one cent a copy.

We profess to be at the Institute primarily for study, with activities as a very profitable side line. In no case must the latter overbalance the former. To say this is, however, a justice that has indulged in that folly on a principle diametrically opposite to this. It is allowed by many to serve on the Class Day Committee which is to make arrangements for the social side of a graduation in which they can not possibly become eligible. This year saw no exception to the rule. Those are the students of the Class Day Committee who can not possibly graduate. The truth is not the fault; it is that of the definition of who are seniors.

The present interpretation of the constitution would indicate that a majority of the studies with the class does not require primary object of studies and doing what extra they can in activities. Should they not be given the credit for this, the sincerity of four year's work.

The Point System was founded on the principle of a minimum appointee amount of time to activities and work. This will carry out the same idea. Activities are profitable and certainly worth while to all who enter into them but over indulgence or rather neglect of studies is still possible, and does not deserve the reward of election to the Class Day Committee. Those who do both well and there are many who have been able to attend to their studies as during their four years at the Institute and in doing what extra they can in activities. Should they not be given the credit for this, the sincerity of four year's work.

It will keep you in touch with the work of the leaders in all branches of civil engineering and construction.

It will make clear the practical applications of the engineering principles you are studying.

The RECORD is devoted exclusively to the students of interest to civil engineers.

Its contents contain an immense amount of valuable technical and practical information on engineering work.

You should have this information on file for future reference. Some day you will need it in your work.

The Engineering Record is published weekly at $3.00 a year

Over 2000 Pages of Reading Matter Per Annum

Special Student Rate, $2.50 a year
