Students of Civil Engineering
You should read the ENGINEERING RECORD in connection with your studies.
It describes engineering works which exemplify the best practice in design and construction.

It will keep you in touch with the work of the leaders in all branches of civil engineering and construction.

It will make clear the practical applications of the engineering principles you are studying.

The RECORD is devoted exclusively to sub sect of interest to civil engineers.
Its volumes contain an immense amount of valuable technical and practical information on engineering work.
You should have this information on file for future reference.
Some day you will need it in your work.

The Engineering Record is published weekly at $3.00 a year.

Over 2000 Pages of Reading Matter Per Annum.

Special Student Rate, $2.50 a year.

SEND FOR SAMPLE COPY TODAY.

REMEMBER
MATERIALS for Spring and Summer wear, both Foreign and Domestic, are now ready for your inspection.
Your Patronage is Solicited.
Early Orders Desired.

The CLASS DAY Committee, and in the meantime, let us hope that they will put aside all personal feelings and vote as they feel will reflect to the best interests of the Class the Future.

Opponents to be Springfield, Race to be Held on Connecticut Week From Saturday, May 13.

VARIETY CREW TAKES ANOTHER RACE.

Alfredy, the results of the fine showing, made by our Varsity Crew in their race with the Midistles at Annanpolis, have begun to come forth. The few of this is an invitation from the Board of Trade of Springfield, Mass., to the Crew for a race to be rowed against the Springfield High School eight on the Connecticut, Saturday, May 13.

This race is planned as a preliminary to the big race between Yale and the Pennsylvania crew, which comes on that date. The course for the race will be upstream from Springfield the name of shot, the big race. The distance will be two miles, the same as the Crew passed on the Severn last Saturday. This is about all that the crew can stand with so little time for training as they have had this spring. It gives them a chance to show their speed without getting to the point of exhaustion. The Annapolis race showed only too plainly what the result of a longer race would have been for the Academy crew could not get a lead until the very finish of the race. It was evident to the observers that the condition of the Technology Crew would not have permitted a longer race; it would have been a case of steady chase through out the remainder of the course.

The Springfield Crew is a fast bunch of school boys, who have been coached by the old school star champion, H. Bennett. He has developed an eight for the crew which has been simply a stern chase throughout the remainder of the course.

The Engineering Record is published weekly at $3.00 a year.
