**TO INSPECT MONTREAL'S DOCKING FACILITIES**

Real Estate Exchange and Business Men have Organized a Trip of Inspection

PARTY 300 STRONG

Other Parts of New England Will be Represented by Business Men

The Massachusetts Real Estate Exchange, which has advanced a paid commission to develop the docking and shipping facilities of Boston, decided yesterday to make a tour of inspection of the model docks of Montreal, Canada's biggest summer shipping point.

With the members of the exchange, the trip will go delegates from the Board of Trade and the Chamber of Commerce, and, if he can arrange it, Governor Foss, in vice-president of the exchange.

The trip of inspection is scheduled for June 6, 7 and 8. The arrival of the party will be marked by a banquet tendered by the Montreal Board of Trade in conjunction with the other leading organizations of the city.

Premier Laurier is expected to be present, together with a prominent official of the Grand Trunk railroad and of the Montreal Harbour Commission.

The next day, Wednesday, June 8, the party will make a thorough inspection of harbor and docks and the modern facilities that have been in operation in Montreal for the handling of commerce. Other trips will be made to points of interest in the city also.

The party will arrive in Boston Thursday morning about eight o'clock. About 300 are expected to make the trip and special trains have been arranged to accommodate the investigators.

At several cities along the route through New England, the trains will stop to make reports of representatives of other trade organizations, making the party representative of all New England as well as of Massachusetts.

Special invitations have been issued to the members of the legislative committee on metropolitan affairs, that they may have this opportunity to see modern port of Montreal handles the summer commerce of Canada, and to be able to apply the knowledge gained to the needs of Boston.

The project was discussed and definitely decided yesterday at a large and enthusiastic meeting of the exchange at the City Club. The decision was unanimous, and immediately following it, Secretary C. E. Lewis was instructed by requests for reservations for the trip. After the meeting a delegation of delegates of members of the exchange, headed by President March, waited on Governor Foss to invite him to accompany the party. There is every prospect that the invitation will be accepted.

Announcement:
We have increased our facilities to such an extent that we will be able to handle a very large share of the typewriter work that must be done the coming week. Even though you may not be able to complete working up your notes during the first part of the week, we will be able to do the work for you in the best possible manner, and at the same time, at no increase above our regular rates.

This thesis work will in no way interfere with our regular printing department so that we will be able to get out anything in the way of small job printing or circular letters. If anything is in the way of printing, typing, editing, or parer, call on us. We will be open all summer.
