Miller Made Acting Head of Department—Schwab Also on Retired List.

Among the most important changes in the faculty which have taken place this summer, the one of greatest importance is the resignation of Professor Gaetano Lanza from the headship of the Department of Mechanical Engineering and the subsequent appointment of Professor Miller as acting head of the department.

Professor Lanza, who will retire as Professor Emeritus, has been associated with the Institute since 1875 when he first took up his duties here as an instructor of mathematics. He was appointed to associate professor of mathematics in 1872, and 1875 he became a full professor of mathematics and theoretical and applied mechanics. In 1883 he became the head of the Department of Mechanical Engineering and Applied Mechanics.

PROF. GAETANO LANZA

MEMBERS OF FACULTY RECEIVE PROMOTIONS.

New MenAppear on the Instructing Staff and Old Assistants Have Gone.

During the summer there have been a large number of changes in the personnel of the Faculty and the Instructing Staff of the Institute. Many Men have gone up and down and others have left for various reasons. Professor W. H. Nichols, a prominent member of the faculty for over 10 years, has resigned from the rank of head of the Mechanical Engineering Department and one of the other departments, Biology, has had its name changed to the Department of Biological and Physical Sciences. The new name is in recognition of the efforts of Professor W. H. Nichols, who has served as the head of the department for many years.

The Corporation has changed the titles of W. H. Walker from Professor of Chemistry to Professor of Chemical Engineering and W. K. Lewis from Assistant Professor of Chemistry to Assistant Professor of Chemical Engineering. Associate Professor G. N. Lewis has been promoted to Professor of Chemistry.

The other changes are as follows: Promotion by departments showing the men who have left as well as those who are just coming.

Mechanical Engineering.

Institute.

Electrical Engineering.

Chemical Engineering.

Mechanical Engineering.

ARCHITECTURE.

Promoted—J. A. Eames, Inst. to: Gaetano Lanza, Prof. to Emeritus.

Mineral Engineering and Metallurgy.

Promotion—F. G. Perry, Asst. to Inst.

COACH KANALY HAS GREAT SUCCESS

Twenty-four Races and Wins Professional Championship for Middle Distances.

Although the athletes of Technology did not seem up very strong in the intercollegiate meets over the summer, their success in the major events has been made good in the open meets during the summer. The names of Harvey Ben., T. H. Gushing, P. W. Dismulkey, T. A. Wilson, and Gale Shedd were among the prominent ones, but none succeeded as well as their coach, Mr. Kanaly, who while abroad defeated the leaders of the profession in class. Many years ago Mr. Kanaly was the best-long-distance runner of the profession, but few of his old followers thought that he still had the "stuff" in him to win the world's championship in the middle distance class, most difficult of any races.

All the races were run in Great Britain between July 1 and September 3, and of the 24 runs Mr. Kanaly got six firsts and six seconds. He was always severely handicapped and ran all "off classes," first class and up, and his performances were as follows: July 1, in the York Vale games at Burnham, shortened from 1,500 to 850 yards but was unleashed in the full distance, in the 850-yard race, he ran 4.20 and was second; on the 25th in the 3,000-yard race at Keelo, he ran the middle half-mile race, and got second in the mile and twice-mile races. On the 24th, at Faro he ran two races from scratch, but did not place. At Lichfield in the half-mile he was unplaced, but won a second place in the mile. On the 25th in the 3,000-yard race, he ran 9.46, but was unplaced in the full mile at Keswick he got a second in his heat of the half-mile, but placed first in the finals as also in the mile.

On the 25th he defeated T. C. Davis for the half-mile in the fast time of 1.54.5 on a short track. On the 26th he ran 10 yards behind the winner of a half-mile race who ran from the 85-yard mark in 1.52.6. On September 3 he led H. A. Wilson by over 100 yards in a mile race to determine the World's Championship. The time was 4.21. On September 2, at Blackpool show grounds, he ran from scratch in a mile race, limit handicap was 185 yards and got second. The winning from the 90-yard mark and timed 4.18. Kanaly's time was 4.20. His last race was on September 4, at the Stanley Athletic Grounds, when he defeated E. C. Clarke of Liverpool in a match race of a mile and a half. Kanaly broke down at the 34 mark and Kanaly rushed in 7.14.6.
