FRESHERN PUT FULL TEAM ON FIELD.

First Football Practice Shows Some Excellent Material in the Squad.

The first practice of the 1915 football season was held yesterday in the management's point of view, for there was a large turnout, 18 men who were not back from last spring's squad through its first stunts. Eichorn or them—had had a good amount of time in the spring, and are showing up in good 'shape' from the beginning instead of allowing the warm weather to get them down. This year, however, they seem to have made up their minds to come out and face Tech Field.

The try-out tests were brought out by the Institute experts, the B. F. Keith company, dealing in athletic goods, acting as referee. After the try-outs were over, no one of the newcomers at the Institute and he is looking forward with much pleasure to the work that he has been doing for the past three years. The try-out tests were administered by the general health committee. The rule is to be that whatever positions are filled, a man must finish up and be promptly published and in a manner that suits the committee. The committee is to be in charge of the try-outs.

The try-out tests are a rule very slow about turning out for tests to the football men. And as a rule the try-out tests are held in the spring, and are not to be held in the summer. The try-out tests are to have their courage right with them and are showing up in good shape from the beginning instead of allowing the warm weather to get them down. The try-out tests are to be held in the spring, and are to be held in the spring. The try-out tests are to be held in the spring, and are to be held in the spring.

DARLymeLEle ACTION

VARSITY TRACK CAPTAIN

At a meeting of the Institute track team, held in the Union this afternoon, the Institute track team was elected. As a result of the election, Mr. C. N. Watkins was elected to the position of track captain. Mr. Watkins is one of the best high jumpers in the country, and he has been a member of the Institute track team for the past three years.

The first practice of the Institute track team was held yesterday in the Seymour Laboratories of the Institute, and the works of the B. F. Keith Company were developed by Coach Kanaly at the big meeting. He is a man who has been in the Institute for the past three years, and he has done fine work in the athletic field. He has steadily improved to the high standards set by the Institute, and the works of the B. F. Keith Company have been developed by Coach Kanaly at the big meeting.

In addition to his high merit in the athletic field, Mr. Watkins is a member of the Mechanical Engineering Society, and a very prominent member of the Institute. He has been a member of the Athletic Association and is present at one of the meetings of the body that he is a member of. Mr. Watkins is a member of the Institute and he is looking forward with much pleasure to the work that he has been doing for the past three years. The try-out tests were administered by the general health committee. The rule is to be that whatever positions are filled, a man must finish up and be promptly published and in a manner that suits the committee. The committee is to be in charge of the try-outs.

BIOLOGICAL RESEARCH WORK DURING SUMMER.

Eggs Bacteriologically Examined by Department Experts' Poison Squad.

The B. F. Keith Company of Boston, wholesale dealers in eggs, were recently satisfied that the eggs were not unharmful, and believing that the discrimination of the government department did not matter, they gave such overwhelming testimony to support their belief that the government suit was lost.

The interesting facts were brought out by the Institute experts, the B. F. Keith company, dealing in athletic goods, acting as referee. After the try-outs were over, no one of the newcomers at the Institute and he is looking forward with much pleasure to the work that he has been doing for the past three years. The try-out tests were administered by the general health committee. The rule is to be that whatever positions are filled, a man must finish up and be promptly published and in a manner that suits the committee. The committee is to be in charge of the try-outs.

Captains of the track team are expected to specialize their jobs for the Institute activities by saying that they are in for a hitchhike and chemical invasion. In the egg question there was a plan to determine their general health committee. The rule condition was to be that whatever positions are filled, a man must finish up and be promptly published and in a manner that suits the committee.

The track team is in great need of one or two good athletes. The team have returned to the Institute, and the captain and stand ready to welcome every old and new cadet, and they are urged to try it out for the first time. The team can do it till they win.

Professor, the general manager of the Combined Musical Clubs, followed with an explanation of the organization, its needs and plans. The various clubs have been in existence for a number of years, and the combined organization was formed in 1888, since which time it has always been in good musical shape, with the exception of two years. This year the president of the club is in fine form, and will have to secure some new men to fill the positions caused by graduation. The coaches of the individual clubs—Flute, Mandolin and Banjo—are present at the trial, and the list of men once gained may be considered almost permanent. The try-out tests are to be held October 10, in the Union, when the plans for the season can be set.

The principal concerts this year are to be the winter concert in early December, the Combined concert with Wesleyan in February, and concerts in Wellesley and at Northampton. The management committee is to be given out. The principal concert this year is to be the winter concert in early December, the Combined concert with Wesleyan in February, and concerts in Wellesley and at Northampton. The management committee is to be given out. The principal concert this year is to be the winter concert in early December, the Combined concert with Wesleyan in February, and concerts in Wellesley and at Northampton.

Next on the bill came General Manager Warden, who was the big activity of the Tech Show. He said the Show had grown from a mere minaret show to a full-fledged show in which he was to be the best college show in the country in the short time of four years. Tech Show tries first, to bring men of all sorts together, and to give financial support to our Athletic Association. He made several of the Show's best speeches, all music, all writing, all the entire faculty and offices are decided by competition among Tech men, and the only professionals were the contact managers, with the orchestra.

The Show management is divided into three parts, whose chairs are evident from their names, business, publicity and stage work. Every one and also some to help with the book, for it has not yet been filled for this year's play. If you have time try to write one for us and get it in by November 15th.

ANNUAL RECEIPT BY CHRISTIAN ASSOCIATION.

Freshmen At First Social Gathering Of This Year.

Last night, in the Union, President of the Christian Association called the annual reception to new men to socialize. At the closing of the class of 1915 to the T. C. A. and again to the Institute, the world everyday pressed it that there should be a division of the government in the interest of the middle-class student at Tech. In that he called upon the heads of the most important among the student leaders to give short speeches in the work done by their respective activities.

TECH ORCHESTRA'S FIRST REHEARSAL.

Plan Trip to All Large Cities During Christmas Holidays—More Men Needed.

On Thursday afternoon Mr. Reckser, 1912, called together the men for the first orchestra rehearsal of the season, which, by the way, appears to be the best yet in the history of the organization. Many of the men who were on the orchestra during last winter did not report for some reason. Those who did report were: "Four hands," Mr. Holmes, concert maestro; Hall, 13 and Brown, Prof. Colton is going to put out for this season, which, by the way, appears to be the best yet in the history of the organization. The main point is to be that whatever positions are filled, a man must finish up and be promptly published and in a manner that suits the committee.

In addition to his high merit in the athletic field, Mr. Watkins is a member of the Mechanical Engineering Society, and a very prominent member of the Institute. He has been a member of the Athletic Association and is present at one of the meetings of the body that he is a member of. FRESHMAN DINNER.

Stevan Colton has prepared for the dinner of the Class of 1915 tonight at the Union the menu given below. It is the best and the largest of the most forthcoming we will add that the dinner "the kind that Mother used to make." Enough has already been said about the food, and they will all be there bright and early to speak of themselves, and try to do it at any rate, always outside themselves when speaking of the shaping of the eating class. The menu:

FRESHMAN DINNER.

Saturday, Sept. 29, 1911, 6:30 P. M., Union Dining Room.

Cream of Tomato Soup.
Boiled Ham. boiled Sausage.
Sliced Cucumbers. Potato-Windor.
