Subscriptions within the Boston Postal District and outside of the United States must be accompanied by postage at the rate of one cent a copy.

Printed by Crooke Printing Co.

SATURDAY, SEPT. 30, 1911.

SATURDAY, SEPT. 30, 1911.

THE TECH will call for candidates from the new men for every department. It is up to the new men to come and to explain to the men the workings of the various departments. Every man should be ready in regular order for the next day's work.

This afternoon there was a fine showing and there should be an even more steady pressure at the Oval this afternoon to get onto the signal work. The schedule is one that will take a lot out of the men and for that reason there will be a large squad of men kept here. This means that if you are not good enough to make the team you can help the class almost as much. The last team will have a second bunch of men to work on every day and somebody will have to do a lot of work.

You all have a good chance to make the team and it is up to every man who is a member of the class of 1914 to do something towards a victory at the field on the third of November next. The first thing that comes in this practice of the football team at this afternoon is the class at the Oval: put on some old clothes and show up at two o'clock and have a record bunch of men out.

Above each with 100 cc. of salt solution; 400 Petri dishes; 800 pipettes, and 20 bottles of agar. As fast as a jar or bottle was used it was promptly replaced another one. This necessitated that there should be ready in regular order every night the following clean and sterile materials: 400 egg stain, one for white and one for yolk of the separate eggs; 20 dilution bottles dried.
