English High Leads Other Pub-
lic Schools—Registration
From Suburbs Is Large.

One of the items of greatest interest
both to students and those in the
 locality is always the preparatory
school, because there is great diver-
sion as to relative merits and not a
little rivalry between the different
preparatory institutions. Recently five
of the Boston public schools is the
Mechanic Arts High School, which
adds to its usual, already strong in the
mechanical section, the new mem-
bers. This is a natural leading,
also Tech carries out the plan of de-
veloping mechanics. Next comes the
English High School with 19 students enter-
ing Technology this year. This school
was not able to be highly gratifying to
the able, except a little of the standard,
for it has been noted that the school is of very doubtful utility, and this
is evident in the length that there is an E. H. S.
officially.

One of the items of greatest interest
this year, however, is the school of
science. Since Tech carries out the plan of do-
ing some work, with 14 students entering,
