THE ORIGINAL NON-LEAKABLE FOUNTAIN PEN

The easiest pen to fill. One of the features which makes Moore's non-leakable fountain pen the easiest pen to fill is the non-leakable ink flow from the reservoir in the pen body. This feature makes it possible to fill the pen with ink and then use it immediately without the ink flowing out. The non-leakable ink flow ensures that the ink is contained in the reservoir until it is ready to be used. This makes it more convenient to use the pen and eliminates the risk of ink leakage. For further details, consult the leaflet given or call for a sample pen.
