Throughout instruction will be given in tying the various knots, risers and applied, knowledge of which is very useful in all branches of manual labor; and in addition, the particular and appropriate use of each and the avoidance of unsafe knots will be explained.

This instruction will be of a practical nature in that Major Cole will take on the various lashings for temporary field structures, such as tents, guns, shears, hold-fasts, barbel-rafts, etc.

It is desirable to have short sessions and be able to give the course very often, in order that the course may extend over some weeks. The classes are to decide which of them will take this course, and all men interested in the glories of the day, and all men interested in the glories of the day will be encouraged to arrange the class or classes so that as many of them as possible may receive this instruction.
