PROVISIONAL TEAM PICKED FOR FRESHMEN

Elections and Final Team To Be Picked Today—Lyons Counters.

Directly after the long tug-of-war practice which the Freshman team had yesterday afternoon, from 4 to 5.30 o'clock, the provisional team was picked for Field Day. Manager Lyons was chosen as coounter, and Kennedy, who weighs 220 pounds, as anchor. About forty-five men were out for tryouts, and were divided into two teams, which pulled against each other. The work has progressed to such a point that Coaches Law and Wilson have announced that the final selection will be made tonight.

The final pick will not be an easy task, for the result of the season's tests will have to be taken into consideration with each man's ability to pull and stick to it. The coaches have a large field to select from, for all types and sizes are represented. Some have had experience before, but for the most part the candidates are novices. For the week nearly half a man has missed a practice. This necessitates carefully accounting for the allowed extra work of the squad. Every candidate for the team in due course is supposed to be the hardest of them chosen twenty-five.

HARD SCRIMMAGE FOR SOPHS YESTERDAY

Teams Make Good Showing—Final Selection To Be Made Today.

The Sophomores' football squad had its hard scrimmage yesterday afternoon at the Tech Field. This was the first scrimmage this year, and the picking of the men who are to play against their opponents today. The men, knowing this, played extremely hard, which was good for the team.

The signal drill was fast and the reaches were mistimed with the exception which the 114 men are showing in the offensive. A hand-passed scrimmage was played by the first and second squads.

There was no very marked score, but the men showed up well as a whole. The tackles have not yet been decided upon. Shaw, Montgomery, Ford, Bell, Brown, Crowell and Cleaver are all working hard for the position. Hardy and Ross seem to be the first choice for guards, though Moore and Thompson have done well. The team probably will be Storke and Hinke.

The tackle will be in the back field. The line for the team will be announced today by Coach Blake at the last moment before the game.

SPECIAL!

Watch for the Big Special Issue of THE TECH on Field Day. The only offer will be free tickets to all new students. The new students will never forgive you unless you buy your friends a copy. You needn't worry we will mail you all the tickets you require without any cost to you for mailing. The more you want to mail, the better we like it.

Tickets for Field Day on sale in the Union every noon.

BIOLOGICAL DINNER THIS EVENING

Professors Sedgwick and Porter On List of Speakers—Open To All Interested.

The Biological Society will hold its first meeting and dinner this evening in the Union Dining Room. This promise will be one of the most important events of the society that has ever occurred. It is possible that a large number will turn out and make a sociable gathering in the society.

The meeting and dinner will be held at 7 o'clock, the provisional team was selected today to be held previous to the dinner.

The meeting and dinner will be held at 7 o'clock, the provisional team was selected today to be held previous to the dinner.

AUTO MANUFACTURE TO BE ILLUSTRATED

Studebaker Company Sends A Large Number of Good Films.

The moving picture show and stereo-epidrome lecture planned by the Technical Engineering society will be presented tomorrow night in Huntington Hall. There will be six thousand feet of moving picture film and one hundred lantern slides illustrating the methods of manufacturing automobiles, the special methods used, and the operation of the machines. Both the lecture and the demonstration are given under the direction of the Studebaker Corporation of Detroit, Mich.

It is expected that this meeting will be very successful since it has been given before by the same corporation for the students of the University of Michigan in Ann Arbor with good results. It was well received by the students there that the corporation decided to appropriate a certain fund for its repetition before the leading technical colleges of the country. They are now sending two special representatives with an exhibit and lecture to Technology. W. H. Welger of the Studebaker Company has been in Boston for a while to arrange all necessary arrangements.

The society extends an invitation to all men at the Institute. It is hoped that a large number of students will turn out, especially members of other societies. The meeting is free, and the subject is of interest to all. A chance to ask questions will be given after the lecture. Therefore everyone is invited.

CATHOLIC CLUB Has Interesting Meeting Arranged For This Evening.

The second meeting of the year will be held tonight by the Catholic Club at 7.30 o'clock in the Union. The entire program will be given to every Technology man as a grant. The Catholic Club has had a notable success, and those who are sure to attend a large gathering of students of the engineering courses.

Mr. Rourke graduated from the Illinois Institute of Technology twenty-five years ago, and had subsequently had a wide and varied experience as a civil engineer. He has spent many years in Central and South America and is now chief civil engineer on one section of the Panama Canal. Now the work he is doing concerns every Institute man who has to concern himself with roads and bridges, for the water table is unusually high in that part of the world where the latter is flat, and it is further from the surface on the summits of hills and nearer to it in valleys than you could imagine. The surface of this water table is constantly in motion, its higher portion flowing toward the low outlets along the river or the sea. This explains why fresh water is commonly found where a wall is dug in a sandy beach.

CALENDAR.

Wednesday, November 1, 1911.
310—Board Meeting, Lunch—Upper Office.
4:00—Sorority Dinner Meeting,—Union.
4:30—Book Practice—Tennis—Union.
7:30—Field Day—Commence at 10:45 a.m.
8:30—Freshman Relay Practice—Field.
9:00—Social Science Society—Union.
11:00—Catholic Club Convention—Union.
11:30—Field Day—Commence at 10:45 a.m.
12:00—Field Day—Commence at 10:45 a.m.
